BOSTON, MONDAY, AUGUST 29, 1927-VOL. XIX, NO. 232

TAX REDUCTION WORK LAID OUT FOR COMMITTEE

Mr. Green Calls Session for October—Both Parties Seek Credit

VIGOROUS CONTEST ASSURED CONGRESS

certain by Observer

Special from Monitor Bureau

WASHINGTON, Aug. 29—The work of formulating a tax reduction program and drafting a bill for that purpose will be started Oct. 31. William R. Green (R.), Representative from Iowa, chairman of the House ways and Means Committee, which originates such legislation, has issued a call for the committee to meet on that date.

It is his plan to have the committee work throughout the month of the House as soon as Congress convenes the first week in December. Mr. Green has expressed himself as opposed to a special session of Congress.

The writing and enacting of tax legislation will be one of the major political issues of the forthcoming congress. Both parties are véry desirous of accruing credit to thempelicans, under the leadership of Treasury executives, are minimizing the surplus available for tax reduction, while the Democrats are insisting that the sum available for this purpose is anywhere from \$300,000.000.

Not Giving Out Figures

In a statement containing his views

Not Giving Out Figures Not Giving Out Figures

In a statement containing his views on the controversy of surplus, Mr. Green took issue with Treasury and thorities that only \$150,000,000 in surplus would be available for tax reduction. He agreed, however, with the administration leaders that if a substantial reduction was effected Congress would have to be careful about the expenditures it authorizes.

Mr. Green would not estimate any definite sum as the possible surplus, although some weeks ago he indicated that he doubted whether a reduction of \$300,000,000 as forecast by some Democratic leaders would be possible.

Sult is a clearly apparent increase in overhead costs, with an increase in costs of merchandise inevitably following."

Pride of Detroit Reaches Munich—London Airmen

The bitter contest that is certain The bitter contest that is certain to be waged between Democrats and Republicans over the tax-reduction project is complicated by several factors; the margin between the parties in the House is very small, and in the Bonate they are exemy divided with the further complication that the insurgents of both sides hold the balance of power; and secondly, the insurgents, who have already indicated their determination to oppose such proposals as repeal of the exemption.

Terry Tully and Tames Medcalf took of from London (Ont.) on a non-stop flight to London, Eng., but were forced back by a storm.

cated their determination to oppose such proposals as repeal of the estate tax, will be in a position to make themselves felt very considerably in the final enactment of tax legislation.

This situation makes the outlook, as far as an administration program of tax legislation goes, most uncertain. Farm bloc leaders with an avowed intention of renewing their efforts in behalf of the McNary-Haugen bill, and Democrats with plans for an attack on the tariff act, are certain to influence materially the alignment not only in favor of a tax measure, but on the various classic (Continued on Page 3, Column 5)

chapter today.

Terry Tully and Vames Medcalf took off from London, Eng., but were forced back by a storm.

Edward F. Schlee and William S. Brock made the second leg of their round the world race against time between the world race against time form the world race against time force, and makes the outlook, as far as an administration program of tax legislation goes, most uncertainty that Parket and William S. Brock made the second leg of their round the world race against time force in the world race agains

ress all over the Nation. It is a little slower and a little harder to enforce in the large cities, but the law is making headway, nevertheless.

"President Coolidge is for absolute enforcement of the prohibition laws. He always has been. But he is for enforcement of all laws and for that reason has not felt that he should take any decided stand for one law over another.

"I believe Andrew Mellon, Secretary of the Treasury and chief enforcement officer, is absolutely sincere and honest in his efforts to enforce the prohibition laws which have been placed in his charge. Regardless of what has been said of his personal views and what they may be, I know he places enforcement of the laws of the Nation first.

Thinks Change Inadvisable

officers who in numerous addresses law enforcement, urges all citizens to vote, and urges dry voters actively

to vote, and urges dry voters actively to support dry candidates.
"Prohibition is the best method of dealing with the liquor traffic," declared the succinct platform which has replaced lengthy convention resolutions, "The benefits derived from it are in direct proportion to the observance of the law and to the degree of enforcement. We commend Federal and State officers who at personal risk are faithfully doing their duty. We pledge our support to an educational campaign to promote law observance."

law observance." Assurance of Support A powerful ally for the W. C. T. U. FOR SCHOOLS in its newly stated policy of working for dry candidates in all parties was

Mr. Nichols Tells Finance
Commission Present System
Is Unjust to Taxpayers

The Boston Finance Commission has before it for consideration at its next meeting a request from Mayor Nichols asking the commission to consider the advisability of installing an "adequate" budget system in the school department.

The Mayor says that under the present system the school committee's budget absorbs all of the money the Legislature allows it to appropriate from the taxes without regard as to whether it needs that amount or not. He charges that this system results in failure to control expenditures, with resulting injustice to the taxpayers.

Explains Veto

His letter which the commission has before it is as follows:

In its newly stated policy of working for dry candidates in all parties was announced when a telegram from Mrs. Lucy W. Peabody, president of the Woman's Law Enforcement League, was read to the convention. "We stand with you," wired Mrs. Peabody, speaking for her influential organization. "We heartily approve your suggested action and the report indicating your strong stand on platforms and candidates."

This stand was reaffirmed in the resolutions committee statement which declared that "dry voters should actively support dry candidates for nomination and election."

With a flat refusal, the W. C. T. U. platform dismissed the Canadian plan as a substitute for prohibition. "Under this plan," the platform declared. "the old-fashioned bartender reappears as a civic employee. Every claim for the Canadian plan as a solution of the liquor problem has been disproved by the official records of the Dominion and Provincial Governments."

Nonandatory referenda as used

members of hospital staffs who as agent."

In the school rooms of the Nation where nearly a helf century ago the W. C. T. U. began its education for prohibition, a still broader educational campaign is planned now. Its

object is to teach the sound logic known saloons.

Approval of this program already

approval of this program already under way in 30 states was voiced by a group of active educators who addressed the convention. James M. McConnell, state superintendent of public instruction of Minnesota; W.

Upholding the recent action of the National Education Association, which has recommended that schools renew their temperance education, Mr. Webster said, "The 800,000 teachers of our country are going to labor with 20,000,000 boys and girls until the curse of intemperance is lifted."

Dr. Alfred F. Hughes, president of Hamiline University, St. Paul, brought

Bast Syracuse, N. Y., who won the Grand Diamond Medal of the W. C. T. U. for her, reading, "Guarding America's Glory," It is estimated that 56,000 young men and women took part in the preliminary contests that led up to the finals here.

The diamond medal contest held at this convention, the first in a decade, marks the revival of an educational method that helped to bring about prohibition. Get the young people to declaim temperance, one of the pioneer members of the organization believed, and you will fill the air with sound reasons for the abolition of the saloon. Mrs. Adelia E. Carman, who established the oratorical contests, began the work in her own parlor.

A defense of the boys and girls of oday was made by Dr. Valeria H. Parker of New York City, director of the department of social morality of the W. C. T. U. "In spite of pessimistic and noisy charges," she said, "a study of the facts must convince the earnest inquirer that the morals of our youth are not becoming degraded but that the contrary is the graded but that the contrary is the case."

Mr. Volstend Presented

Presentation of Andrew J. Vol-stead was a main feature of the Saturday convention program. A big bouquet was given the man whose bouquet was given the man whose name has become synonymous with prohibition. Mr. Volstead said in an interview that he thought the decision of the W. C. T. U. to enter actively into politics to get dry nominations was wise. "It is the only thing for them to do," he said. "Since prohibition is the best method to bring about temperance, they need to act politically."

his address to the convention Mr. Volstead voiced approval of the recent reorganization of the Federal Prohibition Enforcement Service. As to proposals of wets to obtain modification, he said, "You cannot have prohibition with beer and wine."

OIL CONCERNS BLAMED FOR "BLUE SKY" TACTICS

WASHINGTON (A)-The Federal Trade Commission has ordered eight Texas oil concerns to "cease misrepresenting to the public their holdings and financial earnings." The

eight companies involved are: Henry H. Hoffman and others of Houston; J. H. Crites and others of Fort Worth; Roller Oil & Refining Company, Inc., and others of Mexia; Dispatch Petroleum Company and others of Wichita Falls; Perryman Investment Company of Houston; MD-American Oil & Refining Com-pany and others of Fort Worth; Right Way Royalty Syndicate of Forth Worth, and S. F. Shepard and others of Chicago.

With Maps and "Courses"

By Wireless via Postal Telegraph from Halitax

CROYDON, Aug. 29—British courtesy to the round-the-world fliers, William Brock and E. F. Schlee, was exemplified when the intrepid Americans were provided with maps and "courses" from Croydon to Munich, thence to Constantinople, carefully worked out by pilots of Imperial Airways at the request of D. L. Eskell, traffic superintendent. The fact that the Americans, owing to the inadequancy of maps aboard the Pride of Detroit were compelled to fly three hours needlessly over Devon and Cornwall before locating the Croydon airdrome indicated the lack of important equipment, according to the aeronautical correspondent of The Times, who after seeing the charts said they were "totally inadequate for the identification of anything but broad coast lines."

could not locate the Croydon field.

Experts consider that, in view of his inexperience as a pilot, he made a good landing, especially as the stabilizer on the plane was not properly adjusted. They were somewhat alarmed until he came to earth what alarmed until he came to earth safely.

have been going on for more than a year revenue act and provided a flat tax of 3 per cent on passenger cars and trucks. In February, 1919, the the bow and stern of various types of ships an increase in speed amounting to a nautical mile an hour may be gained. This would give many of that freight vessels an average speed. the freight vessels an average speed of 13½ nautical miles an hour. Costs for the re-conditioning would be approximately 60 per cent of the cost of building a new vessel of similar

type.

The Shipping Board has \$15,000,000 left of a \$25,000,000 appropriation for modernization of its fleet, \$10,000,000 having already been spent mostly for the Dieselization of the former steam-propelled craft. The Gibbs plan may be utilized, inasmuch as this would include Diesel-drive and have the advantages of additional

speed.

The vessels in the laid-up fleet of the Shipping Board, which are actually for sale, although no bidders have come forward for many of them, were said to be of the right

Germany Is Disappointed Over the Evacuation Decision

BERLIN, Aug. 29—Germany is disappointed about the Allies' decision to reduce the strength of their occupying forces in the Rhinelands by 10,000 men. This is far too little and by no means in fulfillment of the promise made in 1925 when the Allies spoke of a "noticeable" reduction and a reduction to "normal figures."

Two years after the conclusion of the Locarno pact, one year after Germany's entrance into the League of Nations, and despite the fact that the time had come for considering complete evacuation, the Allies have reduced their troops by a petty 10,000 months of the control of t 000 men, it is said here. This con-cession, moreover, was made so grudgingly it fails to arouse any enthusiasm, let alone gratitude, in Ger-many. Why do the French want to keep their armies in the Rhinelands? it is asked. Are their soldiers to ac already outside the hangar and after testing the engine, Mr. Brock taxled to the filling station and when the engine had been again tested the two men stood chatting with friends and acquaintances, among them Col. I. Edwards, who motored here specially to convey the congratulations of the British Air Ministry on what he described as a "very fine effort."

"We now have upon this side of the ocean," says the Manchester Guardian, "no fewer than nine different machines whose occupants hope soon to cross the Atlantic in a westerly direction, so that much attention in the immediate future will be centered upon them; but it is difficult to get out of reach of the telegraph these days, and the further progress of the Pride of Detroit will be followed in this country with great interest."

MOTOR WAR TAX TO BE OPPOSED

North Carolina Members of Congress Are Pledged to Repeal of Excise

Special from Monitor Bureau GREENSBORO (Special Correpondence)-North Carolina members of Congress will support vigor ously the movement to repeal the 3 per cent war excise tax on pascording to expressions received by C. W. Roberts, vice-president of the Carolina Motor Club.

The automobile excise tax is the only war levy remaining on any form of transportation. It was enacted Oct. 4, 1917, under the emergency war revenue act and provided a flat less were exempted. In February, 1926, the 3 per cent tax on trucks and the 2½ per cent levy on parts and accessories were repealed, and in March of the same year the 5

per cent levy on passenger cars was reduced to 3 per cent. "This yields about \$70,000,000 an-nually." Mr. Roberts said, "and on Dec. 31, 1926, the total revenue on automotive equipment had amounted to \$1,039,071,746.53. This tax is collected by the Government through the manufacturer but it is added to the price of the automobile, passed on to the dealer and ultimately collected from the motorist. Average retail price of cars is \$835 and repeal of the tax would mean an average saving of \$18 per car. Every manuthe amount of the abolished tax on cars. Senator Lee Overman and Representatives Charles M. Stedman, William C. Hammor, A. L. Bulwinkle, Lindsay Warren and R. L. Doughton have reiterated their opposition to the tax which is being opposed by the Carolina Motor Club and 907 other clubs comprising the American Automobile Association as well as several other national organizations."

Whether Hudson's Straits Are Commercially Naviga- WOMAN MAKES ble Is to Be Studied

HALIFAX, N. S. (Special Correspondence)—An importnt expedition sent out by the Canadian Government left Halifax recently for Hudson's Straits. The purbose of this expedition is to investigate the practicability of the use of the Hudge

Various interests in western Canida that are behind the construction of the Hudson's Bay Railway, the es-tablishment of grain shipping ports on the shores of Hudson's Bay, and a direct sea route to Europe, demanded that such an expedition be sent out to ascertain whether navigation of the Straits can be maintained throughout the year. The expedition is well fitted out to determine over a period of 16 months exactly what the conditions within the Straits are; whether they are closed by ice to such an extent that they will not be practicable for the world's compracticable for the world's commerce, or whether they are open, and men, and now Miss Cordery has set can be made a commercial avenue up another women's record, all of with proper navigation aids, such as which shows that women are gradulights, buoys, wireless stations, lightlouses, and air stations.

The expedition is under the com-mand of Maj. M. B. McLean, formerly assistant superintending engineer of the St. Lawrence Ship Channel. The personnel numbers about 50, includ-ing three squadrons of the Royal Canadian Air Force, and also ful equipment for three wireless sta tions. These stations are expected to keep the expedition in hourly touch with Ottawa during the whole time the expedition is employed at their work.

The expedition is also provided with a moving picture photographer, under contract with the Federal Government, with instructions to film the entire expedition from start to finish. The biological board also sends a representative to make comprehen-

sive atudy of fisheries.

The expedition sailed in two ships, the Canadian Government Ship Stanley, an icebreaker, thoroughly reconditioned for her work, and the reighter Larch, which carries a cargo of equipment and apparatus which is said to have cost over \$1,000,000. Three base stations will be established, one near Port Burwell at the eastern entrance of the Straits, another at Nottingham Island at the western entrance of the Straits, and another halfway be-tween, which will be situated on the north shore of the Straits. Each station will consist of seven buildings—two dwellings, two han-

gars, one powerhouse and two store houses. There will be two Fokke ROBERT E. GILMAN

COLORADO RIVER POWER RIGHTS IS CHIEF ISSUE

Governor of Utah Foresees Agreement on Allocation of Water Division

DENVER, Colo., Aug. 29 (Special) plete ratification of the seven-Colorado River compact can never be obtained until an agreenever be obtained until an agreement is drawn between the interested states concerning power projects and the royalities from such projects, it developed here as the delegates from each state prepared for the second week of the seven-state conference. The first week was occupied with an attempt to bring California and Arizona to an amicable agreement regarding the division of water allotted to the three lower-basin states. That has not yet been accomplished.

lotted to the three lower-basin states. That has not yet been accomplished. The four upper-basin states, Colorado, Wyoming, New Mexico, and Utah, drew up a compromise suggestion that was definitely rejected Saturday by the governors of both California and Arizano. The governors of the four upper states then met again in secret session with their advisers and prepared another compromise which was presented to the representatives of California and Arizana.

Prospects Considered Bright Concerning the outlook of the conference, its chairman, Gov. George Dern of Utah, said: "I consider the prospect of an agreement over division of the water between California and Arizona very bright. The first reaction of the two delegations to the proposal submitted Saturday by the upper states was favorable. I believe, however, it is now apparent that ratification of the compact cannot be assured until the power quesot be assured until the power ques-"We had hoped that Arizona would

approve the treaty, as would California, without the power question being made an issue. But California and Arisona cannot agree on that question and both would like to have it settled before ratification is con-sidered. Several of the other states

sidered. Several of the other states feel the same way.

"If a water division agreement is reached, as I expect, the conference will either adjourn to a later date, when the power question will be taken up, or that will be settled here now without adjournment. The majority opinion is apparently in favor of settling it now. Gov. C. G. Young of California and Gov. F. B. Balzar of Nevada were both compelled to return to their respective capitals Saturday on account of urgent official business, but there is no significance to their departure and their commissioners are fully empowered to act for their states."

Wants Problem Settled Wants Problem Settled

Gov. George W. P. Hunt of Arizona relterated Saturday his previous statement that he was prepared to "stay here all summer" if it was "stay here all summer" if it was necessary in order to get the Colorado River problem settled one way or the other. The four upper states and Nevada have ratified the compact as originally drawn in Santa Fe, N. M., in 1922. Arizona has never taken action on the pact, and California's ratification was made conditional on erection of the Boulder Canyon Dam being assured first.

The proposal drawn by the upper states as a compromise Saturday differed but little from the first. Its main provisions were: \$,500,000 acre feet of water shall be divided between California, Arizona and Newada, instead of the 7,500,000 acre feet provided specifically in the comference of the compact of the compact

which she can use by diversion be-fore they reach the main stream; California, Utah, Nevada and New Mexico to have the first and pre-ferred right to the use of all waters of their respective tributaries of the Colorado, which may be diverted be-

fore the waters enter the main river below Lees Ferry.

Arizona and California may each divert and use one-half of the unallocated waters of the main rizer flowing below Lees Ferry, subject to the caustable approximant to future equitable apportionment be-tween the states of the river system after 1963, as provided in the com-pact, and on the specific condition that the use of such waters shall be without prejudice to the rights of the upper-basin states to further allocation of water as provided in the

MERGER OF SMALL SCHOOLS IS SOUGHT

MINNEAPOLIS, Minn. (Special Correspondence) — The elimination of rural schools in Minnesota having MINNEAPOLIS, Minn. (Special Correspondence) — The elimination of rural schools in Minnesota having an enrollment of less than 14 pupils, by consolidating them with larger units, is sought by M. L. Jacobson, state director of rural education.

Referring to the records of Minnesota rural schools for 1925-26 he pointed out that there were 463 schools enrolling fewer than 10 pupils during the term. The average cost for a school was \$870 wife a second addition, authorized by pils during the term. The average cost for a school was \$870 with an average daily cost of 76 cents for each s during the term. The average st for a school was \$870 with an erage daily cost of 76 cents for each pil. A total of 138 "10 pupil lery, is being built at a cost of \$300, not their children to larger schools. When completed, the exhibition of their children to larger schools. Space will be nearly twice its former senator. send their children to larger schools.
Under this arrangement the average cost for each district was \$632 and the average pupil cost was 40 cents

IOWA AIRPORTS WIN PRAISE OF COL. LINDBERGH

One Dedicated at Des Moines and Another Is Opened at Mason City

DES MOINES, Ia., Aug. 29 (Special)—Iowa today dedicated two new airports, one at Des Molnes and the other at Mason City, with Col. Charles A. Lindbergh, exponent of more airplane landing fields, the guest at both ceremonies.

Today's dedication program of the Des Moines airport was linked with the Iowa State Fair, the greatest in the state's history, which is being held this week. A large natural amphitheater at one end of the new field was the scene of the ceremonies, with military guards stamonies, with military guards sta-tioned on the grounds to assist police in protecting the birdlike half of "We."

"We."

A plat of the Des Moines flying field was the gift to Colonel Lindberg as a token of this city's contribution to aviation. Mayor Fred Hunter, George Yates, president of the local branch of the National Aernonautical Association, and F. E. Caldwell of the Boeing Air Transport Corporation were principals on the program.

Arrivas by Airplane

Arrives by Airplane

The "Flying Colonel" was the guest of Col. Hanford MacNider, Assistant Secretary of War, at the Mason City dedication exercises Sunday. The airport in that city belongs to the local post of the American Le-gion, of which Colonel MacNider is past national commander. The Assistant Secretary, in keeping with the character of the event, arrived in Mason City, in a great Fokker airplane the evening before, accompanied by Mrs. MacNider, Ralph panied by Mrs. MacNider, Ralph Cram of Dayenport, governor of the National Aeronautical Association, and others.
Colonel Lindbergh commended

the efforts citizens have made to-ward the advancement of aviation, through providing suitable landing fields for aricraft and spoke of the increased interest the Nation is tak-ing in aviation. Capt. Eugene Kew, commander of the Mason City Legion

Au Quatrieme

A Set of Louis XIV Toile Peinte Wall Panels

Painted canvas as a wall decoration belongs to the 17th and 18th Centuries, occurring frequently in the South of France, where wood panelling was less often used.

The canvas was stretched upon the plastered walls and the decorations painted upon the grounds detrempe. Each was a decoration made for a special setting and the figures and landscape designs were contained within central medallions "and finished with other medallions above and below."

The panels Au Quatrieme are of a beautiful ultra marine blue with the medallion outlined and traceries in a soft azure and putty color, the birds, scenes and figures accented with brilliant orange, merged into a softly flaming gray-green tone that is altogether exquisite.

The Panels are 8 ft. 6 in high Two panels 4 ft. 4 in. wide Two panels 5 ft. 4 in. wide One panel 20 inches wide

CITY MANAGER RULE SUCCEEDS AT CINCINNATI

Streets Greatly Improved, Building Expanded, and Transportation Aided

CINCINNATI, O., Aug. 29 (Special) -With municipal election in November, residents of Cincinnati are taking stock of the city manager form of government and the definite ad-vance in civic pride wrought by the change in the city's charter, which was initiated three years ago. That there has been a change is self-evi-

"The record of progress in Cincinnati," he said, "during the last year and a half is the best proof that could be adduced that Amer-

icans have not forgotten how to govern themselves. It is a justifica-tion of the theory of democracy. "In 1924 the City Charter Amend-ment was passed by an overwhelm-ing vote in a presidential year. This gave the citizens the right to nomi-nate candidates for Council by peti-tion and broke the power which had

"In 1925 the citizens with a free field before them selected six of the nine councilmen. It was these six councilmen who selected Col. C. O.

"The work of the present city government in 1926 and 1927 has won the praise of citizens and has justified their choice. Streets are re-paired, the city is clean, necessary improvements are approved and the citizens no longer ask what is the tax rate but point with pride to the results obtained with the tax

Voters Indorse Program

Bond issues to the extent of more than \$4,000,000 were submitted to the rublic, and, whereas for years everything in this shape had been voted down, full approval to a plan of progress and betterment was given by the voters. There are about 600 miles of paved

streets in Cincinnati. Repairs had to be made in practically every block, in all about 1,000,000 square yards. Practically twice as much asphaltic repair and resurfacing was done as in 1925, but notwithstanding this the cost of materials used was \$348.363. as against \$407,046 in the previous year. In view of the enormous mount of effective repair work done the would appear that the labor cost would have been greater but the 1926 payrolls show \$351,130 expended, as against \$340,163. This is not the whole story, for nine months of 1925 were at a lower wage scale Oct. 1 of that year.

IOWA FARM SURVEYS

The British Government will provide funds for the acquiring of stock and spondence)—There is a more hopeful feeling in Iowa farming circles today than has been shown since the 1920 defiation period, says L. A. Andrew, state superintendent of banking, after examining quarterly reports from country bankers closely banking, after examining quarterly reports from country bankers closely affiliated with agricultural interests,

for the three months ending June 30. Deposits totaling more than \$559,-900,000 in state and savings banks and trust companies, coming under the commissioner's jurisdiction, re-fect a healthy business condition, it s reported. The most forceful indication of improved banking condi-tions is shown in a decrease of bills payable and rediscounts of nearly \$3,000,000 over the March 23 reports.

1710 Eye Street Just Off 17th Street WASHINGTON, D. C. MISS CATHRYN CHALONER, Hostess

It is remembered that Woodchester was not only near to three great Roman roads, the Fosse Way, and Icknelld and Akeman Streets, but was also the center of an extensive chain of military fortifications on the hills commanding the Severn. Lysons considered that no situation in southwest Britain was more advantageous for the residence of a Roman governor, and stated that more Roman remains have been found within 15 miles of Woodchester than anywhere else in England. He believes that although there is no mention of

where else in England. He believes that aithough there is no mention of any town or military station in the locality, in all probability one or both of these existed.

An interesting tradition also obtains that Paul may possibly have visited Woodchester and preached Christianity on the great parement itself. Lyons, in his "History of Gloucestershire," gives grounds for thinking that Paul visited Britain and preached at the Cross, Gloucester, possibly between the years A. D. 61-68, when a gap occurs in his Biblical biography (II Tim. 4: 2): "Claudia," wife of Pudens, a Roman senator, was the daughter of the senator, was the daughter of the senator, was the daughter of the British King, Caractacus. There was every reason, therefore, that he should make his way later to Woodshould make his way later to wood-chester at a time when possibly the then Roman Emperor was in resi-dence at the villa. If so, the hall con-taining the great pavement would certainly be the scene of his recep-

certainly be the scene of his reception and subsequent preaching.
With regard to the date and probable occupant of the villa, however, Dr. A. C. Headlam, Bishop of Gloucester, challenges Lysons' conjectures, placing the date of the villa much later, that is, at the end of the third century, and believing the occupier to have been merely a wealthy Gloucester merchant, who had made

Re Mawr while others modeled on Brya Mawr are Sweet Briar in Virginia and the school at the University of Wisconsin. All have gone forward this summer with marked success, and reports show that the movement is spreading. An offer of its buildings

is spreading. An offer of its buildings by Western University at Cincinnati had to be turned down this year because of lack of funds to establish a school there.

In the opinion of Miss Hilda W. Smith, director of the school at Bryn Mawr, the summer school plan should be materially strengthened by the establishment of elementary schools for workers in various parts schools for workers in various parts of the country, leaving Bryn Mawr and various other schools free to give

only advanced work.

"Girls coming from great distances for first-year work at the Bryn Mawr School, often do so at great personal sacrifice," said Miss Smith.

"It would help them greatly if they could go to a school within a few could go to a school within a few miles of their own homes and there test out their ability to take up the work. When such schools are estab-lished we shall be able to take 100 20 or less as at present, and in this

To judge a store is to judge the merit of its merchandise. This store has ever put its faith in the keenness of judgment of value-wise women. A faith that has been fruitfully rewarded by the thousands of shoppers who throng our counters daily. They recognize immediately the values we constantly strive to present. Low price that sacrifices not a bit of quality. The Young Men's Shop WEARING

MIAMI GREETS GREEK SOCIETY IN CONVENTION

Ahepa Members Reiterate Loyalty for America and Institutions

MIAMI, Fla., Aug. 29 (Special)-With an attendance of 500 delegates representing 150 lodges throughout the United States, and in the presence of 1500 visiting members, Ahepa, Greek-American fraternity, today epened its fifth annual convention in the Hotel Columbus here. E. G. Sewell, Mayor, had called on "all Miamians to express their hospitality to the Grecian visitors," and Flagler Street presented a gay appearance with its displays of American and Greek flags and colors.

The formal opening was marked by addresses of welcome by Mr. Sewell on behalf of Miami and John Martin Color of Flagler of the Martin Color of Particles of the Color of the

Martin, Governor of Florida, on behalf of the State. Responses were made by V. I. Chebithes of Washing. ton, supreme president of the order, and by Andrew Nickas, supreme secretary, and George Demeter, past supreme president and chairman of

the Boston delegation. The opening day was spent by the delegates in getting the convention nachinery operating smoothly and to the reports of the Su-Lodge officers, the election of convention officers and the appointment of necessary committees. At night there was an initiation of 50 candidates into the local chapter and

the remaining four days were to be taken up with various activities. On every hand was heard com-mendation of the efforts of the con-vention committee of Miami Chapter No. 14 for the excellence of the ar-

With the number of active chap-ters that the order has throughout the United States, covering every section of the country, and its steadily growing influence, this convention is of direct interest to some 22,000 members of the fraternity and of general interest to 300,000 Greeks in America who understand the purposes of the organization.

Originated in Georgia Prompted by the realization that an organization was needed that would have an immediate and insistent appeal to the Greeks in the United States and, at the same time embody the highest traditions of the great fraternities of the world that have played their part in the ad-

vancement of peoples and nations, eight earnest citizens of Atlanta, Ga., proposed the Order of Ahepa. Their plan was to form a fraternal order to promote loyalty and patriotism, and to perpetuate good fellowship. To that end they pledged each member of the order to the

following ideals:
"To promote and encourage loyalty
to the United States of America, allegiance to its Constitution and tra-ditions, obedience to the laws of the land and the ordinances of all its

legally constituted subdivisions;
"To instruct its members in the tenets and principles of Democracy, and in the methods and operation of political life in the United States, and inspire in the entire member-ship a genuine reverence for the

majesty of the law;
"To instill in every one of its
members a sincere love for the
United States, its history and traditions, and a due appreciation of the privileges of citizenship, with the sacred duties attendant thereto;

"To encourage its members to al-ways be profoundly interested and intelligently active in the political, social, civic and commercial life of the United States and to strive always for its betterment:

To promote in the United States a better and more comprehensive understanding of the Greek Nation and people, and to revive and mar-shal into active service for America the noblest attributes and highest ideals of Hellenism;
"To support and maintain the

American system of public schools;
"To resist any union of church and state in the United States, or any tendency thereto, and strictly insist that no church shall undertake to dominate in any manner the Govern ment of the .United States."

Has Had Lively Growth From the organization of the original lodge with its eight mem-

bers the order has enjoyed unusual expansion and has become an imirtant factor in the advancement ing Americanism, in its broadest sense, to those who have made the United States the land of their adop-

The aims and ideals of the order made an instant appeal to the better class of Greek-American citizen and now has many progressive Greeks in its 150 chapters.

who come to this country, is in nost tion to work with them intelligently and so present to them the advan tages of American citizenship, and of learning the English language, so that they may further advance themselves as they mingle with the peo-ple, read the better type of publica-tions and grow in understanding of this country's traditions and laws

New York's artist colony, known as Greenwich Village, the prediction is and ideals.

Says Greeks True Americans

"Fortunately for the Greeks, America has never had a Greek problem in the sense of having large bodies of a certain nationality, who would not learn the language of the country and who only mingled with members of their own race and read the papers printed in their own language. I feel that the Greek is the real cosmopolitan, in that he readily adapts himself to his environment, learns the language of the country he adopts, intelligently studies the laws and makes an effort to become a real citizen, proud of and loyal to the country of his adoption, yet appreciative of the heritage of a race that has put beauty and art foremost through all the centuries.

"We members of Ahepa feel that the order is serving a real and worthy purpose and is filling a need that became more apparent as the number of Greeks increased in the United States. The organization of

subordinate chapters is going ahead steadily and along the lines taid down by the Supreme Lodge, and we are exercising great care to take into the order only those men who have proven their fitness and right, feeling that in that way we are assured of a growth that will be as steady as it is jurposeful and as effective as it is idealistic."

the Sunny Hours"

N A country market town in Nottinghamshire a fortunate little boy was given a bicycle for his seventh anniversary. As weeks and months went on the little fellow was frequently bringing home the cycle with some part damaged or missing—owing to the fact that he was continually lending the machine to his various playmates.

His mother feeling that this was becoming a continuous worry and expense, had a serious talk to her small son one day, pointing out to him the damage that was done by lending the machine to boys who

could not ride.

After much thought the little fellow replied: "Mother, if you say I may not lend it, then I don't want it. Half the fun is in lending to thos who can't buy one." Very humbly the mother accepted the rebuke and determined she would not do anything to check the

unselfish spirit of the child. PHE story of a watchman who, during the historic welcome to Lindbergh in New York, spent most of his time helping little boys—who had been crowded back—to see the nad been crowded back—to see the air hero, has been sent in by Miss J. C. M. "Was not the man truly living up to the sign on his cap?" she adds. "He had watched—seen his younger brother's need and sup-

A CLIPPING from the Bangor (Me.) News, sent in by I. H. D., describes the thoughtfulness of a railroad yard brakeman toward mother who put her children aboard an express train, hurried back to find her necklace, and returned only charges of \$1 and \$2 for each packto find the train had pulled out. Her tears soon disappeared as the yard man telephoned to the nearest switching tower to stop the express, and then commandeered a switch engine and took her to the train.

FROM Manchester, Eng., comes a I contribution by Mrs. D., describ-ing a man considered brusque and unkind, who was found one day on his knees on the lawn taking the greatest of pains in cutting away grass with shears, leaving a lone daisy. "This act of love," she writes, "which spoke of the Father's loving care for all, destroyed in one indi-vidual's thought the suggestion of unkindness which vielded to the ame attitude toward him which he and shown to the tiny flower.'

AIR EXPRESS TO CARRY VARIETY OF PARCELS

NEW YORK (AP)-The first shipments to be sent by the air express which begins operation Sept. 1, will include breakfast food, electrical

new air express labels,
"Inquiries have been received," R.
E. M. Cowie, president of the American Railway Express Company, said, "showing that the field for air express is as broad as business itself. Immediately upon announcement of air express service business in general began to visualize how useful it

ARMY HOUSING PROGRESSING

partment. The department also expects plans to have been completed with great rapidity with the aid of by Sept. 15 for new construction at Camp Devens, Mass.

PRIVATE BASIS FOR AIR MAIL IS DUE SEPT.

Government Gives Up All Lines on That Date to Commercial Company

Special from Monitor Bureau NEW YORK, Aug. 29-Marking the omplete retirement of the Governnent from the airmail routes, except by contract, the Post Office Department will go out of the transconinental airmail business on Sept. 1, when the National Air Transport will take over the eastern division from New York to Chicago. This is the last leg of the transcontinental route to pass from Government to private

Thus the National Air Transport ecomes the largest private enterprise operating commercial aircraft in the United States and second only to the German company known as Deutsche Lufthansa

Passengers and Express The carrying of express matter in imited quantities, as well as passengers, is also contemplated in the new plan, the National Air Transport working in harmony with the American Railway Express. It will pro-vide a regular day and night schedule for the delivery of express matter, the first time this has ever been attempted. The mail and express service will operate on a daily flying basis of approximately 5000 miles.

Airplanes leaving Hadley Field,
New York, at 12:15 p. m., will arrive
in Cleveland at 4:30 p. m., and in
Chicago at 7 p. m. The night service
will leave Hadley Field at 9:35 p. m.,

reaching Cleveland at 2:15 a.m., and Chicago at 5:35 a.m. From Chicago, eastward-bound, the airplanes will leave at 8 a. m., reaching Cleveland at 11 a. m., and Hadley Field at 4:45 p. m. The night east-bound service will leave Chicago at 8 p. m., arriving in Cleveland at 11 p. m. and Hadley

Field at 4:45 a. m.
Chicago will be one of the central distributing points where mail and express will be taken on other airplanes to points on the Pacific Coast and to points south. Rates for expression of the party of the pa press matter will be based on a maximum of 50 cubic inches to each quarter of a pound.

Minimum Charges \$1 to \$2 From New York to Cleveland or Chicago the charge will be 25 cents a quarter of a pound, and to points south 50 cents, with minimum

age, depending on the destination. From Chicago to Dallas the National Air Transport will carry pas-sengers, mail and express and the passenger service may later be extended to New York. The rate will be 10 cents a mile, or \$100 for the

trip from Chicago to Dallas, with proportionate rates for stops along proportionate rates for stops along ntermediate points. Regular schedules will be printed and posted and tickets issued en-titling passengers to "one wicker seat" in the passenger compartment, odates three aft of the

pilot's cockpit.

The present south-bound schedule provides for departure from Chicago at 5:45 a. m. and arriving at Dallas at 5:35 p. m., luncheon being served at the Kansas City field. This is half the time required by the fastest trains between Chicago and Dallas.

The National Air Transport will operate with 36 airplanes, of which 18 will be Douglas biplanes for use in the New York-Chicago service. These are equipped with 12-cylinder water-cooled Liberty motors, and tisements, radio parts, motion picture films and "dummy" packages, sent by collectors who want the

GIANT NOVA SCOTIA TURTLE HALIFAX, N. S. (Special Correspondence)—One of the most re-markable marine wonders ever seen in Nova Scotia waters is a turtle captured recently near Louisburg, which weighs 1000 pounds and is said by experts to be 200 years old. It was taken alive, and will be ex-hibited. COMPROMISE IS REACHED BY NEWSPAPERMEN

Protection of News Threshed Out at Geneva-Resolutions Passed

By Special Cable

GENEVA, Aug. 27-The resolution assed at the International Press Conference for the protection of news represents a compromise between three viewpoints, that of the news agencies, of Lord Riddell, representing the British Newspaper Pub lishers Association, and the German delegation. The first resolution which dealt with unpublished news which dealt with unpublished news, denounced unfair competition, that is to say, attempts to purchase news by underhand methods, tapping news sources, bribery and corruption by press agents. Nobody is to acquire the right of suppressing news in the public interest, but the resolution aims at protecting the right of newspapers and news agencies in the use of legitimately acquired news. How this is to be done was not stated, but this is to be done was not stated, but the conference in voting for the res-olution has in view an international convention, as clearly stated in the second resolution for the establish-ment of judicial procedure against unfair competition along the lines of a decision of the United States supreme court.

No Preferential Rights

first resolution declares that there shall be no preferential rights in official news issued by governments and governmental departments. The second resolution leaves to governments concerned to devise special measures if they think them necessary for the protection of published news by the press or radiocast. What is here established is that What is here established is that newspaper and news organizations shall be entitled after, as before publication, to the reward of their labors and financial expenditure, provided no monopoly of news be established. The second resolution established. The second resolution recommends an international convention for this purpose and requests the Council of the League of Nations to invite the governments to give immediate consideration to this question. The resolutions may be said to represent the average they are the conference. The page views of the conference. The news agencies would have preferred some-thing stronger. Thus Sir Roderick Jones of Reuter's said that none of them had got exactly what they wanted, but he was ready to admit they had got far more than he had expected from a conference of that kind.

Property Rights Recognized Karl A. Bicknell, United Press

said that he was much gratified at the recognition of property rights in news which was far more than he had expected to secure, in view of the divergent opinions. Marcus Könconsidered the resolutions were credit to the conference which drew them up. Thomas W. Macken-zie said that the newspapers of South Africa, had a press law for the pro-tection of news which had worked well and he hoped the resolutions would lead to its general adoption.

Ramon de Franch, representing La Prensa, Argentine, speaking for big newspaper owners, said he was delighted that the First Interna-tional Press Conference should have recognized the protection of news. Georg Bernhard, Germany, though not enthusiastic of the result of the

of the international press was unani-mously accepted.

Children of 26 Nationalities

It is important to note that the Farewell Reception to Guests Includes Varied Program Displaying Many Activities

> More than 200 children representing 26 nationalities from the South End district of Boston, had the climax of their summer vacation at Morgan Memorial Camp near South Athol, Mass., last week when they enacted scenes of camp life for mo-tion picture photographers, news-papermen, writers, and various Mor-gan Memorial officials and visitors. The 600-acre farm in the foothills of the Berkshires was a scene of

bustling activity during the farewell celebration which began with an in-spection day and entertainment, in-cluding a fantasy "In a June Garden"

produced under the direction of the camp teacher of elocution.

Accompanied by the group of writers and officials a number of the children later entertained the guests at the annual Toy Town Tavern cos-tume ball with a program of songs, dances, and skits, and illustrated activities at the South Athol camp.

Closing Days Full of Interest Groups of sightseers, automobiles spinning back and forth, moving pic-ture-cameras clicking, and the happy voices of the camp children as they gave their yells, played games, and gave exhibitions of what they had learned during the summer vacation made the last days of camp unusually

Two new camps were completed dur-ing the last year, a camp for girls made possible through the Commun-ity Child Welfare Association of Massachusetts, and Camp Wokapa,

Old-fashioned kerosene Old-fashioned kerosene lamps have been superseded by an effective lighting system and electric plant, and a bottling plant has been installed. Ginger ale and orange soda as well as the water from the camp spring are bottled for sale thus adding to the income from industrial features of the Morgan Memorial institutions.

Industrial Work Developed Through gifts from interested parties larger water pipes have been put in giving the camp a full supply throughout the summer. A box factory has also been erected and is being used for storage until the installation of necessary equipment provides for the development of further industrial work along the

lines of using waste materials, and weaving blankets. interesting.

Final preparations for breaking is hoped by Morgan Memorial officamp were made Friday evening, and clais that the poles of the telephone

Connecticut Officials Say Three-Quarters of Consumption Is for Heat

HARTFORD, Conn., Aug. 29 (Speial-Substitution of the use of gas for coal in the heating of homes and menufacturing plants, is said to be responsible for the great increase in the consumption of gas reported dur-ing the first six months of the pres-

ing the first six months of the present year.

More than 4,500,000, cubic feet of gas had been used up to July 1, a total which indicates that the state's consumption for the year will greatly exceed the total for 1926. Gas company officials are predicting that it will be necessary to double the capacity of their present plants as well as their capital within the coming decade.

Predictions also have been made that because of lack of space it will be necessary to double the height of the present gas holders instead of increasing their number.

increasing their number.

Heating is consuming more than

three-fourths of the total gas pro-

Yale Law School Professor Announces Results of Connecticut Survey

NEW HAVEN, Conn., Aug. 29 Special)-Various factors tending slow up litigation in Connecticut and the extent of the delays caused by these factors are listed in a reort of the status of commercial arbitration in this State, made public by Prof. Wesley A. Sturges, of the Yale School of Law. The report is the result of a survey of the subject

the result of a survey of the subject made during the past year by Harry Leo Nair of New Britain, Conn., and Monroe Oppenheimer of St. Louis, Mo., two graduate students of the Yale School of Law, under the direction of Professor Sturges.

"One of the advantages commending settlement of commercial disputes by arbitration is the absence of delays which attend court litigation," Professor Sturges says in the report. "In surveying in this connection the need for arbitration in any state, it is therefore of some importance to consider the delays that are met with in its courts."

portance to consider the drays that are met with in its courts."

Delays in litigation in this State, the survey shows, are produced by the following factors: Certain rules of pleading under which a defendant of pleading under which a defendant can unduly postpone the reaching of an issue; the use of jury trials; habits of procrastination on the part of the bar, coupled with certain traditions of professional courtesy in regard to granting continuances and extensions of time; the present method of assigning-cases for trial; conditions causing the absence of attorneys, parties, or the absence of attorneys, parties, or witnesses at the time set for trial; the relatively small number of lawyers by whom most of the trial work is done; the summer vacations of the courts; the crowded condition

of the courts, the crowded condition of the trial dockets; appeals from the judgements of trial courts.

While the crowded condition of the dockets is perhaps the most important cause for delay in the larger cities, other factors, Professor Sturges says, must be considered if an adequate picture of conditions is to be secured. While some of the causes of delay that have been mentioned are more or less inevitable, others could be lessened consider-ably, he believes, by the use of pro-

ably, he believes, by the use of procedural devices now in successful operation in other states.

The results of that part of the survey dealing primarily with the status of commercial arbitration in Connecticut will be made public soon, Professor Sturges said. Similar surveys were conducted during the past year in Massachusetts, New Hampshire, Rhode Island, Virginia, Alabama, California, Washington, Michigan and Ohio. The American Arbitration Association plans to consolidate and publish the reports of these several surveys.

PRESIDENT'S PASTOR FAVORS MR. HOOVER

Dr. Pierce Believes Mr. Coolidge Means What He Says

PORTLAND, Me., Aug. 28 (AP)—"I believe that President Coolidge means exactly what he says and that he will not accept another nomina-tion for Chief Executive," the Rev. Dr. Jason Noble Pierce, the President's pastor at Washington, said in an interview here yesterday.
"My opinion is," Dr. Pierce continued, "that the President believes

firmly convinced that, unless some unusual crisis should come, he will not accept another nomination."

The Bloom are the excursions into the excursions involved a great deal of mountain climbing, occasionally 10 hours a day. Dr. Pierce expressed his conviction that Herbert Hoover would be capable of rendering "most capable service" in the presidential office. "Hoove

is absolutely 'hard boiled' as to the politicians and would go at things olely with the best good of the ountry at view rather than from ncy," he continued. onsiderations of political expediexpressed the belief that the radio might become a potent factor

in bringing about the nomination and election of Mr. Hoover, explaining that his voice lent itself to radio much better than to speak ing at great public gatherings.

OLD-TIME CHURCH

Ludlow Center Observes Its "Old Home Day"

LUDLOW CENTER, Mass., Aug. festation of the "Old Home Day" festation of the "Old Home Day" lidea, was the homely celebration conducted in this community's Congregational Church yesterday. The old-time Sunday services of a century and a half ago were re-enacted layer a marked effect on city plan-The church organ was muffled, while the tunes for the hymns were "set" by an old-time member. After sermon, according to time-hon-d custom, the congregation went to the pine grove nearby for a basket luncheon. The pastor, the Rev. C. A. Hawley, devoted his sermon to a sketch of the history of the church, ich was founded 153 years ago. An evening service was conducted in the Second Congregational Church structure, built in 1839 and now used as a grange hall. This building still ns an old-fashioned boxed-in

SATURDAY RIDING GREATEST

Harvard Geological Party Returns After Successful Expedition to Construct Profile of Range From Lewis Overthrust to the Yoho

and crabs which lived at the surface sity, and Donald Reynolds of Har-of the sea perhaps 100,000,000 years vard, assistant in physiography. The ago were found recently on the highest peaks of the Canadian Rockies by Prof. Percy F. Raymond of Har-vard University and his summer class in geology, and are said to in-dicate that the Rockies at one time were at the bottom of the ocean. Professor Raymond in studying the fish-like speciments discovered and has expressed it as his opinion that they are prehistoric animals of the sea and that the Rocky Mountains, which was the region of their habitat, were entirely submerged under salt water millions of years ago.

An expedition of twenty students from Harvard, Princeton, Brown, and Antioch departed for the Canadian Rockies early in June to spend the summer, not in the luxurious hotels of Banff and Lake Louise, but rather

Generally on Foot

Establishing a mountain camp as their headquarters for a period of several days at a time, the party ventured out into the mountains, sometimes on horseback or by mule, but generally on foot, to explore the adjacent regions for historical and scientific data not available through ordinary text book methods. With one student of the party, an underone student of the party, an inder-graduate of Antioch, serving as cook, the party enjoyed two hearty meals a day in the camps. The other meal they packed with them on their daily hikes to the glacial formations, mountain peaks and valleys. The chief work of the expedition

was to construct a profile and struc-ture section of the mountains run-ning from the Lewis Overthrust in the east, across the divide to the val-ley of the Yoho River. The discovery of new specimens in the animal king-dom was incidental, and the prizes are regarded as an unanticipated bonus. "My opinion is," Dr. Pierce continued, "that the President believes that the best interests of our country pose of constructing the profile map will be served in the ordinary course of events through change at regular intervals in the presidential office. While I have not discussed the matter with President Coolidge, I am these camps, and the excursions in the excursions in the resident Coolidge, I am these camps, and the excursions in the excursions in the company of the control of the control of the control of the course of the control of the course of the control of the course of the

The visitors said the immigration from Norway would continue next year.

BADIO EXPORTS HIGHER THAN PREVIOUS YEAR

Nearly 30 Per Cent of International Trade Goes to United States

Approximately \$30,000,000 worth of wireless apparatus is estimated to have entered into international trade in 1928, according to H. E. Way of the Commerce Department's Electrical, Equipment Division. The United States was the largest exporter, American shipments making up 25.4 per cent of the total; Germany came next with 25.5 per cent, many came next with 25.6 per cent, followed by Great Britain with 26.5 per cent and France with 13.7 per cent. Exports from Germany showed a slight decrease during 1926 as compared with the previous year. United States exports of radio apparatus decreased 12 per cent in 1926 as compared with 1925, amounting to \$8,794,453. Export figures for the first half of this year, however. many came next with 25.6 per cent

first half of this year, however, were valued at \$3,705,861, an increase of \$450,000 over the same period of 1926, indicating that the trade is re-

with the exception of transmitting with the exception of transmitting sets and parts, United States exports of all items of radio apparatus in-creased in the first half of 1927 as compared with 1926. Shipments of receiving sets in the 1927 period were per cent, while exports of receiving set accessories had a value of \$939,-195, an increase of 8 per cent. Exports of transmitting sets and parts fell from \$339,717 to \$157,578, a deof more than 50 per cent from the 1926 figure.

Average Gala 27 Per Cent The average gain of the three classes, sets, tubes, and parts, was 27 per cent. Accessories, which include loudspeakers and head sets, have not kept pace, retarded probably by foreign competition, and be-cause electrical characteristics of American products do not always

higher impedance and resistance. Because of the higher cost of batteries the demand is for units of high resistance. Many consumers are concerned over operation economy, and manufacturers, particularly British, carry in their advertisements curves and technical data, which American firms do not

athinate!

and technical data, which American firms do not.

Since 1920 the average yearly increase in United States radio sales has been 52 per cent. The largest gain was that of 1922 over 1921, when it was 190 per cent. That was the time of the inauguration of radiocasting abroad and of higher average prices. The statistics during that year were distorted, in so far as they affected radiocast receiving apparatus, by several large shipments of transmitting apparatus.

transmitting apparatus,
Radiocasting has passed through
rapid stages of expansion abroad as
it has in the United States, and a more stable market is to be expected.

The demand for apparatus abroad is usually best in the latter half of the year. The reason for the demand being seasonal is partly that the larger markets are in the Northern Hemisphere and partly that export-Hemisphere and partly that export-ers are much more keen in pushing sales abroad when the domestic mar

Month to Month Trends

The month-to-month trends of the north temperate zone parallel domes-tic sales. Influenced by the exports to Canada and Europe, with similar reasons for demand as the season of best reception the foreign sales peak comes in November as compared with December for the United States. This lead is accounted for by the time required for the goods to reach their destination.

Records of shipments to the south-

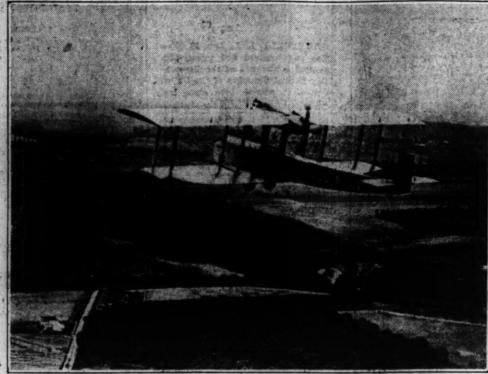

trends except as influenced by the sales policy in the United States, which conclusion is verified by the latest models on the market and (2) curve of month-to-month sales. To christmas buying The climatic efsummarize, there are two major facvalued at \$1,128,625, an increase of 27 per cent; tubes were valued at \$501,-206, an increase of 25 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent, while experts of receiving set components reached a value of \$979,356, an increase of 30 per cent, while experts of receiving set components reached a value of \$979,356, an increase of 30 per cent, while experts of receiving set components reached a value of \$979,356, an increase of 30 per cent, while experts of receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increase of 30 per cent; receiving set components reached a value of \$979,356, an increas occurs in November. The south temperate zone curve also nearly parallels that of the north temperate one for the last half of the year,

being only slighter lower.
Our foreign markets in the south temperate zone follow closely the time when sets are brought out on the American market, as importers buy when the new models are announced. American national advertising in this respect is often inter-national in its scope and influence. Coupled with this stimulus is the

suit the ideas of foreign purchasers. February.

This ship is a biplane in contrast to This ship is a biplane in contrast to the popular monoplane type of ship used in the transoceanic flights which have originated in this country. A very unusual bit of practice is a tandem motor and propeller arrangement, one propeller, being of the "tractor" type and the other of the "pusher" variety.

This ship has been undergoing extensive tests and careful preparation will precede this flight. The photo-

will precede this flight. The photograph shows the Blue Bird flying over an attractive bit of French countryside. The orderly looking detail of France from the air prompted the description by Amer-ican aviators during the war that it seemed, like a "manicured country." Certainly traveling from one place to another in one-half to one-third train time over beautiful stretches like this is a happy contrast to ordinary methods of transportation.

SWANSEA TO OPEN **NEW HIGH SCHOOL**

SWANSEA, Mass., Aug. 29 (Special)-Swansea's new memorial high school, erected by private funds donated by Mrs. Elizabeth R. Stevens, is to be dedicated on Sept. 1. The building, the architects of which are James H. Ritchie and Associates of Boston, is of red brick with stone trimmings and roof of mottled purple

olor slate.
On the first floor is an auditorium with a seating capacity of about 356 people and a memorial vestibule. On this same floor are class rooms, lunch, sewing, domestic science, principal's offices, teacher's room, etc. The second floor contains class rooms, laboratories, bookkeeping and typewriting rooms. There is no basement, the boiler room being in the rear of the main building. the rear of the main building.

BUXING carpets is a fine art; an art that we have been studying at Shoolbreds these ninety years.

We have learnt not only how to collect the finest products of Western and Eastern looms at very moderate prices, but also how to help you buy. In Shoolbreds spacious carpet hall, probably the largest of its kind in London, you will find light and perspective in which the true colour and texture and quality of a carpet cannot escape you.

Jas. Shoolbred & Co. Ltd., Tottenham Court Road, London, W. 1, England

put into effect a brand-new policy that will present an in-teresting change in radiocasting. From time to time prominent radio authorities have advocated a policy of having various stations make a speciality of some one thing. Their thesis has been that you can tune in almost any station and hear a jazz orchestra, a soprano, an orchestra, and so forth, few of which have any outstanding radio qualities.

gram from the Times presents an open forum twice each hour. This will include the usual reading of world-wide news at 8 p. m. and a new departure in a daily sports resume at 6:15 p. m. The open forum ideal will be stressed on the five week days that KHJ is on the air each week. The Sunday program, however, will remain unchanged.

OMMENCING in August, KHJ feminine musical fancy does not in-

masculine contemporaries.

This announcement of WHO safeling of the National Broadcasting Company's networks at the same time that six by the samouncement of WHO safeling some time that some one station make a specialty of jazz orchestras all the time, others of the symphony ensemble, still others of popular songs and in various ways to make it possible for a radio fan to decide what type of entertainment he wants and then tune in the station making a specialty of that kind of program. Perhaps in a large measure such a plan is utoplan: But at any rate, Uncle John of KHJ hencefort his going to make a determined effort to present the best in the speaking voice line of ratio.

KHJ is, what no commercial radio contacts at the same time that with the National Broadcasting Company's not works, at the same time that with the National Broadcasting company's not present the best in the speaking voice line of ratio.

KHJ is, what no commercial radio contacts at the same time that with the National Broadcasting company, and plan is study and the same time that the plans from the Times presents an open forum twice each hour. This sin anouncement of WHO, "should contact set can hope to be, an open forum twice each hour. This will include the usual reading of the included in the speaking of the simple to the same time that the same time that that manked the direction that two others are about to fly from Canada to England.

Hypopher that the two others are about to fly from Canada to England.

NATIONAL CO. Inc. W. A. Ready, Pres., Malden, Mass.

"This announcement of WHO's af-filiation with the National Broadcast-ing Company," states Mr. W. H. Heinz, manager of WHO, "should definitely set at rest rumors that our

stated:

"The piano is the most popular instrument with women musicians, according to facts gleaned from the files of WBAL, Baltimore. It has been found that the majority of pianists heard over WBAL have been women, and of all the many instruments may available for instruction, more women "lake" to the plano than any other instrument. There are, of course, ammercus women organists, but these are het included in this survey.

There are, in fact, but four instruments which women musicians play, according to WBAL's artists' file. These are the piano (farst) then they work of the National Broadcasting Company, which stated:

"There has been a series of articles also one through the country regarding in newspapers throughout the country regarding a nice load of bombs for lower New York City rather than the friendly messages of good will which will feature this trip.

WHO to the contrary. The local newspapers have so-operated with a newspapers have so-operated with a newspapers have so-operated with a to the fullest extent in correcting the error, and we are endeavoring to inform other newspapers throughout the country, so that they may do like wise. We think that this may perhaps best be done through the issuance of a joint statement to the effect.

There are, in fact, but four instruments which women musicians play, according to WBAL's artists' file. These are the piano (farst) then the violin, celto and harp. Apparently. Since then he has continued his plans since the flight itself and not the mission was the real object of his flight; but he adds that he is

much happier that he is now to fly over on a friendly mission.

Adoption of the word "Avigation" as describing aerial navigation as proposed by its inventor, Lieut. Lester Maltland, transpacific, fer, is being enthusiastically advocated by many aviation devotees. It has a

logical sound and is descriptive as well. + + +

A "Drive It Yourself" Airplane club has been organized in Caspes, Wyo., by the name of the Powder River Flying Club, according to reports to the Department of Commèrce. A most complete program of financing has been worked out, and it is likely that this program and the experience of this club will

More than 1700 reserve pilots have More than 1700 reserve pilots have taken or are taking flying training this summer at the various army fields. Out of 7000 reserve officers listed as pilots, only 654 are rated as Class A pilots. This is deployed by the authorities in Washington, and it is suggested that an increase in opportunities for reserve officers to fly would augment this number. The following notes are also from Washington. Washington.

Said to Allow of Ami-

Cable Settlement

By SISLEY HUDDLESTON

Special from Monitor Bureau

PARIS—There is no more important subject for Europe than the relations of the powers in the Mediterranean. The Atlantic side is controlled by Spain and France, who are installed in Morocco, and by Britain in Gibraltar. France continues to exercise authority in Northern Africa by means of its special situation in Algeria and in Tunisia. Then comes Italy, with the Tripolitania and Cyrenaica, which Tripolitania and Cyrenaica, which together compose Libya. Britain ex-Arabian lands, particularly in Palestine and Transjordania. The French have a mandate for Syria. The Italians in 1911 took the island of Rhodes with the Dodecanese islands from the Turks. On the European time of the standard of the standa tends some sway over Egypt, and, beyond the Suez Canal, in the Arabian lands, particularly in Pales-tine and Transjordania. The French from the Turks. On the European side, Greece, Albania, Jugoslavia, Italy, France and Spain command

the Mediterranean littoral.
All these countries, on the African,
Asiatic, and the European littoral of Asiatic, and the European littoral of the Mediterranean, are greatly interested in any changes which might possibly be brought about, and they examine with more than curiosity the expressed desire of Italy for expansion. Italy, occupying the middle of the Mediterranean sea, looks upon itself as the chief Mediterranean power, despite the fact that Britain is in a supreme position at the western entrance and on the eastern side, while France possesses the most important and fruitful parts of northern Africa and Asia Minor. Italy has developed great colonial ambitions, and Signor Mussolini loudly proclaims that his country wishes to reinforce its prestige between the Straits of Gibraltar, the Suez Canal, and the Gulf of Aden.

Angle-Italian Understanding

It is precisely this development of Italian ambitions which has brought to the fore again the problem of the Mediterranean. Between Britain and Italy there is a fair understanding, and it is chiefly between France and Italy that there are indications of misunderstanding, which should not, however, prove to be serious, and should be removed by negotiation. Italy desires to play a greater part in Tangiers, the international town of Morocco. In Tunisia, Italy points but that the Franch Protestorate is out that the French Protectorate is, in reality, mainly colonized by Italians. At the other extremity of the Red Sea, where Italy has a foot-ing in Somaliland and Eritrea, Italy the views of Italy are more nebulous, but in general it may be said that the Peninsula is far from satis-

fled with its present position.

It is no wonder that the attention of the whole world has been directed to the new policy that Italy has fore-shadowed—a policy that may roughly be called that of greater Mediter-ranean control. At bottom, this policy was the cause of the virtual ab-sence of France and Italy from the Geneva Naval Conference. France and Italy are friendly rivals in the Mediterranean, and France could not consent to be placed on the same basis as Italy in respect of lighter craft. Whereas Italy's naval preoccupations are principally Mediter-ranean, France has far-flung colonies

Italy's Mare Nostrum Our sea—Mare Nostrum—say the Italians, when speaking of the Mediterranean; and indeed if one looks at the map one will see that Italy resembles a huge jetty extending into the Mediterranean. In various traceches, and particularly various speeches, and particularly in his triumphal voyage in Libya, Musso-ani intimated the Italian resolve to ani intimated the Italian resolve to realize some of its plans for expansion. Since then the Albanian incidents have underlined the same idea. Albania, at the southern extremity of the Adriatic, a little country situated between Greece and Jugoslavia, and almost forming an enclave in Jugoslavia, with a frontage on the Mediterranean, has to some extent beslavia, with a frontage on the Medi-terranean, has to some extent become, though nominally independent a protectorate of Italy; and Jugo-slavia is naturally resentful that Italy should thus assert a predominance on the southeastern shores of the Adriatic. Hence the disputes which have manifested themselves in which have manifested themselves in specific episodes, and which, after the episodes have ended, still persist, and must, it would seem, sooner or later be brought before the League

Before the World War, Italy's possessions in Africa comprised 2,000,-000 square kilometers, with 2,250,000 inhabitants. This is very little in

comparison with the colonial territories of Great Brittain, France, and Holland. The Dodecanese were only to have been occupied temporarily. Somaliland presented an equatorial character. Eritrea offered an outlet from Ethiopia (Abyssinia) where Italian experiences have been unfortunate, but through which Italy planned to build a railroad which would have been at right angles with the French railroad from Addishababa to Dijlbouti.

Ouestien of Emigration

Question of Emigration

on certain territories of the former Ottoman Empire. Britain, France, Belgium, and Japan gained by that

distribution. Italy was disappointed. Nevertheless, France, in Septem-ber, 1919, consented to a rectification also from Ghat to Tummo. Italy still requires a southerly extension of the ill-defined Libyan frontiers. In 1924 Britain ceded, to Italian Somalliand, the old Jubaland. From Egypt, Italy received the possession of the Oasis of Jaghbub in Cyrenaica. Further, the Dodecanese were annexed by Italy under the treaty of Lausanne in 1923.

Acquisitions Not Important These acquisitions, which are not social problems. Italy requires wheat and coal and iron and oil and textiles, and above all requires land for a population which increases by 600,000 a year. The American immi-gration laws reduce the Italian con-tingent to 5000.

Now that the difficulties which

arose concerning Flume in the north-ern Adriatic are forgotten, Italy is seriously asking how its aspirations can be fulfilled. There are suggestions for a revision of the Franco-British convention of delimitation regarding the frontiers of Libya and French Equatorial Africa. Italy dreams of an Italian block which dreams of an Italian block which would join Somaliland to Eritrea, and this would necessitate concessions on the part of France and Britain. Doubtless much more cot-ton, sugar, and potash, could thus be obtained. By accords with Russia, Italy might obtain Ukrainian wheat, and coal and iron from the Don. The naval base at Leros (Dodecanese) would protect the route by which would come those commodities, be-sides the patrol of the Caucasus. In Albania, too, it is hoped to find fresh

There is no reason whatever why Italy should not, if it keeps its ambitions within bounds, obtain something of these desiderata, by means of negotiations which would doubtless be delicate, but should assuredly be pacific. In any case diplomatists be pacific. In any case diplomatists do not despair of concluding, in the not distant future, a Mediterranean pact which will give satisfaction all which the Cavaliers had thrown him which the Cavaliers had thrown him and the cavaliers had thrown him which the Cavaliers had thrown him the cavaliers had thrown him which the Cavaliers had thrown him thrown him the cavaliers had thrown him the cavaliers had thrown him thrown him thrown him thrown him thrown him thrown him thrown

FORCED LABOR FOR PROFIT CONDEMNED

Labor Office at Geneva Urged to Oppose Exploiting of

LONDON—That the system of compulsory or forced labor for pri-vate profit is "bad in principle and should be abolished" is the view set should be abolished" is the view set forth in a joint memorial to the International Labor Office at Genes which has been forwarded by the League of Nations Union and the Anti-Slavery and Aborigines Society. The memorial urges the Labor Office Commission, now considering this subject, to adopt the view that such forced labor, being "synonymous with slavery" should be totally prohibited, and that government machinery for the recruitment of labor for private enterprise should be held objectionable. Special from Monitor Bureau | construction and so massive is the LONDON—Funds are being raised | brickwork that a goodly portion of

objectionable.

If a central government in Africa finds it necessary to call out the natives for forced labor on the roads, for government buildings or porterage, it should take care to observe

Limitations Proposed "(1) The labor was not called out at harvest time nor upon occasions when exceptional domestic demands were made for hunting, community fishing and so forth.

"(2) It was never called out for accessions which involved the breaking.

hers was called upon to repair the house and to alter the interior apartservice which involved the breaking of family life, and therefore was only employed at a reasonable distance from home.

employed at a reasonable distance from home.

"(3) Where a chief requisitioned labor for his own land or cattle, he did so in virtue of his public position and its obligations.

"Such forced labor called out by chiefs or other local authorities for local purposes is not invariably paid.

though "we believe the practice of paying for it is increasing. In our view, the central government should.

Should Be Exceptional-

Should Be Exceptional.

Forced labor, the memorial continues, should be regarded as exceptional, wages should be provided at the market rate, in no circumstances should women and children be called out for public works, periodic returns to home at short intervals should be arranged, porterage should be rigidly controlled as to weight of load, distance and wages (which should always be paid direct to the porter). Women and children should not be employed as porters.

The memorialists hope that a new convention on forced labor will shortly be enacted to "secure the progressive suppression of forced labor, so as to insure its abolition at the earliest possible date. We hold strongly that the continuance of forced labor in any form its bound to create discontent, and is inimical to progress, while free and paid labor is found to create a demand for the benefits of civilization."

OSLO TO BERLIN AIR BUS STARTS

Passage Saves 18 Hours, and Joins Norway to

complished fact. Each morning at 7:35 the gray Dornier Wal air bus lifts its wings for a nine hours' flight for Berlin, with short stops at Gothenburg, Copenhagen and Stettin. At this last station the hydroplane is charged for a land plane. And each afternoon at about 6:30 another plane rises to land gracefully on the water near Graesholmen, a small island in the Oslo fjord reserved as an air station, and brings passengers from Berlin 18 hours earlier than they could have come here by rail

or water. The Luft Hansa is trying this route as an experiment. Its representative in Norway is the Norske Lutruter A. S., headed by Captain Meisterlin. The Norwegian company has got a concession for two to three

burg is covered in 2% hours; to Copenhagen in 4% hours; and to Stettin in 6% hours. From Berlin nearly all the capitals of Europe can be reached by air. This route marks the first linking up of Norway to the great European air routes.

introduce and enforce a system of payment at the earliest possible RUSSIA TO BEGIN date." NEWER METHODS OF RAISING GRAIN

Antiquated Three-Field System to Give Place to More Productive System

MOSCOW (Special Correspond ence)-The abandonment of the "three-field system" of farming throughout the entire administrative district of Volokolamsk is a first step toward the "westernization" of Russian agriculture. The "three-field ayatem," which hitherto reigned everywhere in Russia's wheat belts, is that used by the peasantry of England down to the thirteenth century. It is a primitive, wasteful system of crop rotation by which two-thirds of the arable land is sown and one-

of the arable land is sown and one-third left fallow.

Now Volokolamsk adopts modern rotation methods, which will, it is calculated, increase the average an-nual crop by about one-third. This is only a beginning. The Soviet Gov-ernment has pledged itself to intro-duce western methods throughout all the vast grain aveas.

THE CHILDREN'S PAGE

Sonny Finds a Brother

By NANCY BUSKETT

PART II T THE Children's Home was a little boy just about Sonny's size. His name was William, but everybody called him Billy. He had been there

only a year.

It had seemed a long year to Billy Boy, but there had been many bright places in it. One real shining spot was that he could draw all the pictures he wanted to with his colored panelies.

Another bright spot, or many spots, was when he visited the Head Matron in her own homelike, private apartment. Billy loved the Head Matron because she allowed him to help sort the children's stockings she was to darn, and sometimes she had candy, too: She let Billy bring his artist's pad and his pencils, and watched him draw pictures of her, and of her cat, Bob.
"You'll be an artist some day, Billy

Boy," she would say.

Saturday Comes Billy had seen many boys leave the Home with new parents, going to real homes and brothers and sis-ters. "Some day I'll get adopted," he told the matron.

he told the matron.

"I'll keep my eyes open for you, Billy, if ever a real artist comes looking for a boy. Then if you don't go forward and ask him if he wouldn't like you for his little boy, it'll be your own fault."

Billy smiled, "I won't have to do that. I expect he'll find me first."

So, when Sonny's mother telephoned the matron, she was asked Daddy's business, and Mother answered, "He's an architect."

"That's good," said the Head Matron. "Come Saturday." But she didn't say anything about Billy. She wanted very much to see if they would pick Billy out themselves.

Saturday morning was bright and sunshiny. It had rained very early while Sonny was asleep in his little room, and Billy asleep in a long row or beds. All the raindrops on the bushes and grass, on the telephone wires and hanging from the proof, were glistening with as many celors as the rainbow has.

Sonny sang happily as he dressed, talking and whistling to a small bird on his window sill, and looking to see if he had one like it on his wall border.

At the Children's Home things

border.

At the Children's Home things were the same as usual. The rising bell rang just as sharply, the children dressed just as quickly and marched into the long dining-room just as promptly for their breakfast. Only the Matron was busier than usual. She was here, there and everywhere, seeing that the reception

Billy.

At the front door Billy turned to the Matron and smiled. "They did find me, didn't they? But I'll come bear to see you."

"We'll both come," said Sonny. And Sonny and his new brother Billy waved good-by to the smiling Matron and ran to catch up with Mother and Daddy.

[THE END]

room and the playroom looked neat and orderly.

At last the door bell rang. The Marron smoothed her hair and her apron. The children stopped playing to watch the visitors as they came in.

Billy sat before his little blackboard, with an artist's pad of white paper propped on it, interested only in drawing pictures. Then the Marron opened the playroom door and there stood Daddy, Mother and Sonny. Souny stood first on one foot, then on the other, not knowing what to do. He couldn't see anyone who seemed like a brother.

"Hello, boys and girls, said his father. Then he patted red, black brown and light heads, saying nice things to them, and making them feel he was partly their daddy, whether he took one of them or not. "Some day," he laughed, "I'm going to treat myself to a picnic with every child in this house."

Mother was saying to the Matron: "However can we pick one? I wish we could adopt them all.

"However can we pick one? I wish we could adopt them all. Sonny Finds Billy

A baby breeze came skipping through the window. It skipped right "I'll keep my eyes open for you, over to Billy's drawing, and blew it

The Puzzling Curly Twins

Now have you seen the curly twins. Can you guess who is who? They are indeed a puzzling pair, You can't tell Anne from Sue. And they each have a curly dog,

As curly as can be, They, too, are such a puzzling pair, You can't tell Wow from Wee But if you'll listen, and come close

I shall give you a clue;
Dog Wow belongs to curly Anne,
Dog Wee to curly Sue,
And Wee prefers to lie a-bed,
And Wow to breakfast early; ow, can you tell which one is And Or Sue, Wow, Wee, so curly?

The Boy Who Is a King

HO is the most precious child in the world? I'm sure that you'll answer without a moment's hesitation that it's your own little brother or sister. And that is surely the correct answer. So I'll put the question in a little different form: Which is the most carefully trained and the means.

He has no right to be king. But the little boy with the tousled hair, playing his leasons, riding his games, learning his leasons, riding his horse and paddling in the water, knows nothing of what this is the most carefully trained and the means.

He has city and country palaces.

The animals and birds once strayed Along our street in mixed parade. They marched by two's. The pairs this time were not by kind; they paired by rhyme.

First came a Bat beside a Cat, Then came a Sheep with Chicky-next ardently watched boy in the latest and paddling in the water, knows nothing of what this means.

means.

He has city and country palaces, winter and summer mansions, special trains, horses and automobiles; he is served by many attendants and guarded by the best soldiers in the land. He has teachers and companions special trains, horses and automobiles; he is served by many attendants and guarded by the best soldiers in the land. He has teachers and companions and counselors and everything more extensive than his. He has all this because little Michael has a supremely important task before him—namely to create a happier future for other boys and girls in his land.

Most of the children in Rumania

in his land.

Most of the children in Rumania live far differently from their King. Their fathers or grandfathers were subject to governments not their own. Everything in the country was backward. The villagers who comprise 53 per cent of the people, until a decade ago, were largely without lands and altogether without political rights. Most of them could not read and write. They lived in tiny houses, worked hard, knew nothing houses, worked hard, knew nothing of the joys of the great happy world and many of them had nothing much

and many of them had nothing much to eat except corn meal.

Then came liberation and every-thing began to change. Schols are springing up by the hundreds. The peasants have land and political rights, industry is advancing, wealth is increasing, and the Rumanian hove see honny days shead.

boys see happy days ahead.

The land has fields like those of Iowa, mountains almost as imposing dance of minerals and a black soil that in places is exceedingly fertile. the King, everyth ing is young and full of hope. Everyone feels that there is no limit to the good fortune that might come to setter named Patches, because his

Rumania.

So happily, solemnly, proudly the Rumanians enter the new era with their box King. There is very saucy their boy King. There is everything to be done. But there's everything to do it with and everybody to do it. Michael, who now plays in the in the middle of the pond. water, soils his suit, laughs, asks "What shall we do?" or for sweets and doesn't want to go to fred,. "We can't possibly wade out

At the Seashore With Fred

"Little drops of water, little grains of stooped for the pretty thing an inand.

Make the mighty ocean and the coming wave broke over her ankles.

"It's after me." Also was a stooped for the pretty thing an in-

ILLY JAKE and Betty Jane had B ILLY JAKE and Betty Jane had never seen the ocean before and now with their dear friend, Fred, they stood gazing out over the restless waters to where the waves chased one another and rose so high that when they broke they looked like puffs of smoke. The children—Betty Jane in a red bathing suit and Billy Jake in a blue one—looked and looked. "Where is the other bank?" asked

Betty Jane at last.
"The other bank!" laughed Fred, "Why, Betty Jane, to reach the other bank you would have to get in a ship and sail away and away for days and days, for the waters of this ocean cover more space than all the land in the world." "Whoopee!" shouted Billy Jake, "I

wish I could ride in a ship and sail and when only their toes stuck out, across the ocean. Then I could see the fishes and the whales an —an all tentedly. "Isn't the ocean fun!" she the things that live under the water. "In a ship you might see a few of them, Billy Jake, but really to see glass bottom, or a submarine. Then you could see the mountains and

Mountains in the Ocean

"Mountains!" exclaimed Billy Jake, his eyes round with astonishment. ocean!" cried Billy Jake. "Why, why, I didn't know there were mountains in the ocean!"

"Oh, yes," said Fred, "the floor of Billy Jake handed it to her. the sea is just like the land. It has "What makes shells?" he asked. mountains and valleys and all kinds of plants. Some of the plants are not

many of these are together, it is like
a great floating meadow."

"Do you spose there are any boats
with glass bottoms around here?"
asked Betty Jane eagerly.

"No," smiled Fred, "for when the

on and tell some more," he begged. "Well," continued Fred, "in among these green plants are little fishes, some a bright golden color and others blue and green. And there is one little fish that spends its whole

time building a nest like a bird's in the tangled weeds." "I wish I could see that little fish," said Betty Jane.

"Never mind," Fred told her, "for there is one thing we do not need a ship to find."
"What is it?" cried Betty Jane, looking all around.

"Shells," said Fred, "beautiful shells which the waves have washed Instantly Betty Jane and Billy Jake

began to hunt. "I see one," cried the sand. Betty Jane, and away she went toward the water. Just as she Patches Goes to the Rescue

asked.

cific?" asked Fred. "Maybe," said Billy Jake. Then he

paused. "What made them call it that funny name?" he asked.

"Do you mean, 'Pacific'?" said Fred. "Well, you see the word means 'peaceful.' A man named Magellan called it that when he crossed it nearly 400 years ago, because it was

Answer to Puzzle

Answer to puzzle published Aug. \$

Photo by Underwood & Underwood

"Many of them do," said Daddy,
"but this one I am telling you about
is a water spider, and is one of the
most remarkable little creatures you
ever heard of. It needs air to breathe

"But where does it get the at to breathe when it stays down under the water?" asked Lottie.

"It takes the air right along with "It takes the air right along with it, and the way it manages this is one of the most interesting things about it. The water spider has lots and lots of little hairs all over its body, and when it darts swiftly down into the water, little bubbles are formed all around it and it is the air in these bubbles that the spider breathes."

"But you started to tell me about its balloon," reminded Lottie.

"I was just coming to that," said Daddy. "It is the mother spider that makes this remarkable balloon. First she goes down under the water and spins and spins until she has made leave it, though it comes up to the a little slik case with an opening at the bottom. Of course water gets in at the opening and this she must at the opening and this she mus

"So she darts up to the surface of the pool and makes a big bubble of air which she takes down to the nest she has just finished spinning. She pumps this air into the nest, then goes up to the surface and makes another bubble and does the same thing with it until she has put enough air in the nest to force the water out air in the nest to force the water out When this is done the nest is ready

for the eggs. "And I'm sure the little silk balloon she has fashioned for them is as snug a home as any baby spider could wish for. She has the ability could wish for. She has the ability to make it so strong and secure that nothing can harm her babies. And that is why it doesn't go to pieces at the least little thing, as yours did." "Well, I'm almost glad mine did pop this time," said Lottie. "Because if it hadn't, I might never have heard of the water spider's wonderful little glik ballega."

MICHAEL, KING OF RUMANIA thing as a spider living in the water," exclaimed Lottie. "I thought spiders sentatives and been solemnly delived out in the garden and made webs in the bushes and grass."

posing Rumanian House of Representatives and been solemnly declared the Sovereign of all the Rumanians. His picture is in all the stores schools and subject and in a million homes. Although he is too young to read and write,

manians. His picture is in all the stores, schools and public buildings Michael, who now plays in the middle of the reached the pond they found the roge broken and the raft floating michael, who now plays in the middle of the raft floating in the raft floating in the middle of the raft floating in the middle of the raft floating in the raft floating is a water spider, and is one of the most remarkable little creatures you ever heard of. It needs air to breathe just as you do, and still its home is under water and if never likes to top and skims along the surface as easily as a seaplane."

In the little creatures you had been it want to go to fred. "We can't possibly wade out there; it's much too deep."

In the little creatures you had come in his name by his three Regents, bring prosperity, enlightenment and power to the "Great Rumania" which his grandfather left for him, and over which he will rule himself when of the Rumanian people adore him, he cemes of age.

"If we could get a long stick maybe we could reach it," suggested over which he will rule himself when of the Rumanian people adore him, he cemes of age.

R. L. S. at Pitlochry

Scarcely a mile farther on up this road-a hot, steep walk on a summer day-there stands, on the left hand by the roadside, above a sloping bit of garden, an unpretentious sation as an art is spiced with courlittle stone house—three gabled tesy, humor, and above all diplomacy. Now I wonder where these three things may be learned in such a between two windows below—a way as to pass into the hinter-lands of thought better than in the cluster of fir-trees on the near side. between two windows below-a reading of an essay a day? For I and a glen opening from the road

versation once again. So, greatly quaring, I venture to make a suggestion. I fairly that nobody of average intelligence could engage in this exercise of reading for long without becomnom reading an essay a day.

For one thing I am sure it will enconstructed with as much care as a shop in Pitlochry High Street whose windows displayed those modern helps to correspondence, picture

essay reader's perception. And when it does it will be like that glorious "No. Where is it?" Or, "No, we moment, when one, after strug-gling in dense obscurity with an-other language than one's own, sudhaven't. Whose house did you say?"
The Falls of Tummel, The Queen's View, The Black Spout, The Salmon's Leap, The Pass of Killie-crankie, each of the hotels, the High denly turns the corner and it is for-ever daylight. I cannot imagine an essay a day being read over a very long period without breaking into some such revelation. Good talkers Street itself, the view from the very road to Moulin,—but Stevenson's cottage—no. Yet there, up that Moulin road, where daily scores of private cars and public motors pass it by, is the cottage in which Robert Louis Stevenson spent two months—June and July 1881—and in which he wrote "Thrawn Janet," and "The Merry Men." "The Merry Men" has in it noth-

ness man saying to a speaker friend, "Your opening peroration was superbil" How many perorations are there in a speech? Probably two or three hundred words in the English shores and great storms, and is one tongue are all that the average person draws upon in a discussion of any kind. But if we company with the essayists of the past and present able, everyday words will no longer. The story is fresh and powerful, saturated with the wholebered scenes long after and in absence. The story is fresh and powerful, saturated with the wholethe essayists of the past and present a bit, everyday words will no longer be withered things. They will take on animation, insight, inevitability. They will become things to brush the dust off, to prune with a gardener's foresight, to polish with a lapidary's skill. They will climb all over us beseeching articulation and use. We shall have handfuls of them to choose from.

Now this is a plea against jargon—not for it! And any reader who intends to act upon the suggestion I

to choose from.

Now this is a plea against jargon
—not for it! And any reader who
intends to act upon the suggestion I
have laid down might begin by reading the chapter in Sir Arthur Quiller-Couch's "Art of Writing," which
deals with jargon. Sancho Panza
said: "How excellent a thing is
said: "How excellent a thing is
learn it wraps a man round like a
learn it wraps a man r sleep; it wraps a man round like a cloak." A jargoner would have said:
"Among the beneficial qualities of was hardly varied for a moment." It makes a bond between it an Tummelside that it was on the sweep of wild moorland beyond Kinnaird Cottage above Pitlochry that "The Master of Ballantrae," begun

> have it in his own words:
> "The final tableau of a story conceived long before on the moors be tween Pitlochry and Strathardle, conceived in Highland rain, in the blend of the smell of heather and peat-bogs. So long ago, so far away it was, that I first evoked the faces

at Saranac, was first conceived.

and the mutual tragic situation of the men of Durrisdeer." . . . Or shall we turn back from Kinnaird Cottage to Pitlochry in the soft valley, going by the field path, which Louis Stevenson must often have taken, with Woggs at his heels? It turns off just beside the Children's Holiday Home, once a manse, now with its happy swing and trampled lawn. You can catch a loving cup of dark brown shadand trampled lawn. You can catch a glimpse through the gate, as you pass, of little town-bred children from Perth or Dundee, all clad alike me I select one. He was telling me of a dark day that had befallen him, and he said: "The sun was brushed from my sky." One dare not hope that my advice in this article will eventuate in diction of that order; but one was heart and the statement of the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The path skirts the field of yellow the said: "The said: "The

but one may be sanguine about some effect for the better. What I mean by elevated diction is simple and direct, stubble, and the edge of the field is fringed with clover and bluebells; it passes a yellow-harled cottage with its patch of potatoes, its bright little flower-garden. Beside the cot-tage the burn is caught into a hollowed split tree-trunk, and from this spout falls noisily on to the stones, and a pitcher stands ready beside it. A plank bridge crosses the stream, and the field-path bethe stream, and the field-path becomes rough and stony, muddy too,
as it continues on by the side of
the widening burn. And the burn
now gurgles deep among watercresses, with a hedge on the other
side rich with wild flowers and the
red leaves and berries of autumn,
and straggling sprays of honeysuckle are caught in the brambles. suckle are caught in the brambles, or dip into the water. Overhead the blue sky fleecy with clouds, and in

Steele, Addison, Charles Lamb, Hazlitt. Having drunk at these fountains, you may wonder if the new will ever be as good as the old. But keep on with good cheer; an essay a day may put your head in the clouds and the pen in your hand!

Can you hear the trumpet calling?

DOUBLES PLAY IS POSTPONED

Japan Defaults Last Two Singles Matches to France

John W. Hubbell, Kansas Citv. and Harris E. Coggeshall Jr., Des Moines, French stars, Jean Borotra and J. Rene Lacoste, are scheduled to play if George E. Abbot and Walter W. Weld of Brookline, Mass.

Benjamin F. Gorchakoff and Norval M. Craig, both of California and New England doubles champions, have defaulted. They were scheduled to meet Henri Cochet and Jacques Brugnon, doubles champions of

France.
William T. Tilden 2d, Germantown,
Pa., and Francis T. Hunter, New Ro-Pa., and Francis T. Hunter, New Rochelle, N. Y., are scheduled to meet in
the first round two lads from the
intermountain section who hold the
doubles championship—Earl W. Pierce
and Lee Butler of Sait Lake City.
Cochet and Brugnon are in the opposite half of the draw from the champions of England, Tilden and Hunter.
The latter team, however, will face
another French team, Lacoste and
Borotra. in the semifinal, barring upsets.

Borotra in the semilian, baring upsets.

The American seeded players are:
Tilden and Hunter, Williams and
Johnston, L. E. Williams and John F.
Hennessey, and George M. Lott Jr.
and John M. Doeg. The overseas seeded
players are: Cochet and Brugnon, Lacoste and Borotra, Jean Washer, Belgium, playing with Frank X. Shield,
New York, and Teizo Toba and Ryuki
Miki, Japan.

TWO CHESS LEADERS FINALLY DEFEATED

Isaacs and Mlotkowski Lose Games in U. S. Tourney

KALAMAZOO, Mich., Aug. 29 (P)—
The two leaders in the United States chess tournament, Lewis J. Isaacs, Chicago, and Stasch Miotkowski, Trenton, N. J., were defeated for the first time in the games here yesterday. Isaacs fell before Abraham Kupchik of New York. After a Ruy Lopez opening on the forty-seventh move, Kupchik sacrificed a bishop for a pawn, paving the way for an attack.

Declining a queen's gambit, R. S. Whitaker, Washington, D. C., instituted a king-side attack against Miotkowski. Sacrifice of a knight on the twenty-ninth move by Whitaker

twenty-ninth move by Whitaker opened lines for all his attacking pieces, forcing the resignation of Miotkowski. Samuel Reshevesky, Detroit, 16-year-old prodigy, laid claims to the prize offered in the tournament for prize offered in the tournament for brilliancy by his play against Eugene J. Roesch, St. Louis, by clever movement of pawns in the sixteenth and following moves. The boy forced Roesch to trade a bishop and knight

not have won with par as Evans had a birdle 3.

By winning Saturday, Jones equaled the record of Walter J. Travis, who won the championship in 1900, 1901 and 1903. The comparison is not quite the same, for Jones was runner-up last year, making his record three championships and once runner-up over a period of four years.

Jones's great golf Saturday fouted the well-trapped and rough-bordered Minikahda course. That venerable nemesis of all but the best golf players, par, had been upset for several days under the punishment meted out by Jones. Saturday the twice-crowned national open, national amateur and

again.

The loser, who has been runner-up three times, twice won the titles, paid the winner high tribute when William C. Fownes Jr., president of the United States Golf Association, standing in States Golf Association, standing in the rain, presented the medals to Jones, the champion, and Evans, the runner-up, and gave Jones the championship cup to take to the Atlanta Athletic Club with him.

In the first 18 holes of his three 26-bells metables in the guarterfinals.

In the first 18 holes of his three ...6-hole matches in the quarterfinals, semifinals and finals, Jones shot 68—69—67, Harrison R. Johnston, Francis D. Ouimet and Evans falling before the attack. The champion played 152 holes in 598 strokes in the champion-ship, five strokes under par and 10 strokes under fours.

Ten Strokes Under 4's Monday and Tuesday he played the 36-hole qualifying round in 142 strokes to become medalist, his second day's 67 establishing a course record. Wednesday, when he had a 78, he did 34 holes in 141 strokes. Thursday's play totaled 27 holes in 104 strokes and Friday he played 26 holes in 100. Saturday's 29 holes used up 111 strokes.

EAST WEST DIVIDE TRAP SHOOT HONORS

Troeh Takes Amateur Double Target Title With 188

ATHLETICS CLAIM Tilden and Hunter SECOND PLACE

Detroit's Run Slackens as Hitting Lets Up-Senators Lose 12 Straight

AMERICAN LEAGUE

New York

defeating Detroit twice in succession. This means that should Philadelphia win its remaining 30 games, which is altogether unlikely, the Yankees could only 15 of their last 30. That New York can capture at least three-quarters of its remaining contesse is practically a certainty, and that means a title victory for it. The next two weeks should find the Yankees sailing along at a faster pace than usual, if anything, for they meet Boston and St. Louis clubs which have taken only two games out of 31 against them this season, in 11 of their next 13 games. St. Louis has lost all 17 of its games against New York this year.

Detroit Run Peters Out

Detroit Run Peters Out the pennant practically linched in the league, followers can turn their attention to the struggle for second place unreservedly for for second place unreservedly for again there is a race going on for that position which is worthy of their interest. The Washington Senators struck a slump this month which forced them to relinquish second and then third place after they had secured a hold on the runner-up position which seemed too much for Detroit or Philadelphis to everyome. They have cured a hold on the runner-up position which seemed too much for Detroit or Philadelphia to overcome. They havelost 12 straight. Washington's extremely heavy slump while both Detroit and Philadelphia hit winning strides, enabled the two last named to pass the Senators in a surprisingly short time. Detroit went 13 games without a defeat and Philadelphia DAYTON. O., Aug. 29—The East and West divided honors in the last day of the Grand American trapshooting tournament on the Amateur Trapshooting Association range Saturday. David Leay of New York won the consolation handicap by breaking 96 targets at 22 yards.

J. E. Van Cise, Youngstown. 22 yards, and Louis H. Robbins, Vincennes, Ind., 17 yards, tied with 95 and Van Cise took second place and Robbins third in the shoot-off. Fourth place went to G. A. Miller, Gettysburg, Pa., 19 yards, over E. T. Johnson Chicago, in a shoot-off. Johnson shot at 21 yards.

Frank D. Troeh, Portland, Ore., won the amateur championship at double

Doubles Winner

Defeat Lott and Doeg in the Newport Final—Alonso Loses in Singles

NEWPORT, R. I., Aug. 29 (P)—William T. Tilden 2d of Germantown, Pa., yesterday won his fifth tennist tournament in five starts over a period of a little more than five weeks, by capturing the eleventh annual invitation event at the famous Newport Casino He won the final from Manuel Alonso, Philadelphia, the Spaniard, who is fanked second to him in the United States, by scores of 5—7, 6—3, 19—7, 6—2. The victory gave Tilden his second leg on the challenge cup he his second leg on the challenge cup he first year the

put up a gallant battle. On Lott's terrific overhead smashirg coupled with Doeg's tremendous service and a goodly number of errors by Tilden and Hunter, they won the first set, scoring 46 points to 39. Lott appeared the steadier of the two, while Tilden was the mainstay on his side of the mainstay on his side of the net.

of the net.

Constantly the younger players directed their fire at Hunter, playing especially to his backhand and overhead. Lott was especially good at this, lobbing gently, then taking the net to kill Hunter's soft return if indeed it came over the net. Doeg aced Tilden three times in the first set, and the third. Tilden disputed, belleving the shot was outside the service court. He was not upheld. In the next game the boys broke through Tilden's servthe boys broke through Tilden's serv ice for the set, 8-6.
Thereafter it was a losing fight for

Thereafter it was a losing fight for the younger players, Tilden growing stronger as he had in singles and often invading his partners' court for the lobs that were meant for Hunter. Hunter, too, rallied gallantly and occasionally surprised Lott and Doeg by smashing one of their arching shots for a placement. In the match he gained considerable advantage practice in the departments in which he is weakest.

tice in the departments in which he is weakest.

A gallary of about 700, mostly Newport residents, attended the matches in spite of the rain.

The semifinals in doubles earlier in the day saw Tilden and Hunter defeat John F. Hennessey of Indianapolis and Lucien E. Williams of Chicago, 16—4, 7—5, 7—5, J. Rene Lacoste of the French Davis Cup team came from Boston to see the finals and played in the mixed doubles. Paired with Miss Eleanora R. Sears of Boston he won from William J. GAMES TODAY Cincinnati at Boston (two games). Chicago at New York. St. Louis at Brooklyn. Pittsburgh at Philadelphia.

With the four clubs, Chicago, St. Louis, Pittsburgh and New York, closely bunched as the league season closing weeks with great interest, and they find that Pittsburgh, now a mat-ter of 3½ games from the top and only two percentage points behind

second place, is favored with the easiest schedule. Second division clubs make up the greater part of the meetings for Pittsburgh, while New York, St. Louis and Chicago are engaged in a great measure in contests against each other.

Today, Tuesday and Wednesday, Pittsburgh plays at Philadelphia while Called the Chicago are sensitive to take a firmer hold on second place with three games against Brooklyn. The important series of the week will be that between Chicago and New York which opens today and continues tomorrow. The New York Giants are just now being watched with close attention by followers, for their record of the last two months has been so impressive that it warrants their being considered strong pennant contenders. During July the Giants won 22 and lost 14 and this month to date they have captured 13 and lost five. If they can take two cares against Chicago. have captured 13 and lost five. If they can take two games against Chicago it would change the figuring in the eague race and reduce the margin of

league race and reduce the margin of the Cubs over the Giants to only 3½ games. On July 1, New York was eight games from the lead. The schedule of the Chicago league-leaders is the most difficult of all for the remaining weeks. After two games with New York, the Cubs meet. Pittsburgh once, Cincinnait twice, St. Louis six times, New York again four Louis six times, New York again four times. Then, following series with Brooklyn, Boston and Philadelphia, they meet Pittsburgh and St. Louis in the closing series of the season. This gives the Cubs little time to rest right up to the closing game, for even Boston is considered as strong as many of the other contenders down the final stretch.

Crucial Series Approaching The series of six games between Louis and Chicago which opens to look forward to as a means of gaining the top. And their last two

games of the season are scheduled Although Pittsburgh's schedule is considered the easiest, that of New York is not much superior. The Giants' opponents during the last two weeks are Philadelphia, Brooklyn and Pittsburgh, the games between the second-division clubs predominating. If New York can maintain its pace until then they will have a fine charge of

Art News and Comment

British Artists' Exhibitions— Sir Joseph Duveen's 1928 Program

ESULTS obtained by the series N of "British Artists' Exhibitions" already held this year couraged Sir Joseph Duveen and his committee to make still er and more ambitious plans for

It will be remembered that this heme-all the expenses of which scheme—all the expenses of which are borne by Sir Joseph Duveen—has a twofold purpose, to promote more sales of contemporary works, especially by lesser known British artists, at home, and also to increase the prestige of British art abroad. The first object is being secured by means of exhibitions held in the principal provincial stitus of Greek means of exhibitions held in the principal provincial cities of Great Britain. The first was held at Leeds, and the second, which has just closed at Manchester, has been even more successful. In two months 45,000 people visited the exhibition, close on 1000 catalogues were sold and, best of all, \$5 pictures out of a total of 391 found purchasers.

Exhibitions of this character are considered to have done well when the sales approach 25 per cent of the total. For example, the Royal Academy—which closed last Saturday—is held to have been more successful than usual because the number of sales has been 302 as against 225 last year; but when it is realized ber of sales has been 302 as against 235 last year; but when it is realized that the total number of exhibits at the Academy was 1698, it will be recognized that the sales at the Duveen exhibition in Manchester were relatively even better.

The next home exhibition under this scheme will be opened by Sir Evelyn Cecil at Bradford on Sept. 16, and this is to be followed by an exhibition at Belfast in November.

n at Belfast in Novem exhibition at Belfast in November. For next year arrangements have already been made to hold similar exhibitions at Plymouth, Glasgow, Derby and Preston, so it will be seen that the whole of the British Isles is being systematically covered by this undertaking. In order to arouse a wider interest in contemporary art and to make the contents of these exhibitions better understood and appreciated by the general public, Sir Joseph Duveen's organization also arranges for lectures on art by competent authorities to be given in each city during ties to be given in each city during the period of the exhibition. All the local authorities have to do is to provide a hall and a lantern and ad-vertise the lectures, as Sir Joseph himself pays the fees and expenses of the lecturers. The scheme is a ar-reaching one, generously planned, and there can be no doubt but that it has already quickened the general nterest in contemporary art.

Several of the London gatleries, which usually close down for the holiday months, are keeping open this August and September, and some of them are not merely prolonging the exhibitions open in July but have taken the unusual course of organizing entirely fresh exhibitions for August and September. For instance, at the Redfern Gallery (27 Old Bond Street) there has been opened a special exhibition of oil paintings and water colors to which Augustus John, Lucien Pissarro, Sir Williah Orpen, William Rothenstein, Ethel Walker, John Nash, S. J. Peploe, Clara Klinghofer, Ethelbert White, Claude Flight, Albert Rutherston and many other well known artists contribute. Most of the exhibits here are pictures of small size, and experience at the Academy and elsewhere has shown which usually close down for the Academy and elsewhere has shown that the demand today is for small moment of writing, however, there works, suitable for modest homes are two undoubtedly interesting and in this city belong entirely to the land of the land

works, suitable for modest homes rather than for stately mansions. A most valuable lesson that is being faught to the home public by the Duveen exhibitions is that original works of art are not beyond the means of people with modest incomes. Many unsophisticated house—holders in the provinces have learnt with little less than astonishment that it is quite possible to buy an original watercolor of a possible to buy an original watercolor of writing, however, there are two undoubtedly interesting and informative exhibitions on view, one of these being a collection of works in the province have being a collection of works by prominent Chilean painters, while the decidedly and insistent self-expression. José ultra modern trend of art in Uruguay. The majority of the Chilean exhibits are landscapes, and it would seem that these artists, like their assurance of youth. That the result is sometimes failure is almost unsorded by the properties of the color of works by prominent Chilean painters, while the decidedly and insistent self-expression. José ultra modern trend of art in Uruguay. The majority of the Chilean exhibits are landscapes, and it would seem that these artists, like their assurance of youth. That the result is sometimes failure is almost unthat it is quite possible to buy an original watercolor, or even a small interpretation of nature their truest source of inspirations. The examples original watercolor, or even a small sketch in oils, for no more than they would have to pay at a furniture store for a "handsomely framed photogravure."

In order to open up a new market Lianos, is a huge canvas depicting all the blue and orange shadows, the light and fantastic outlines, of sunvisidom on the part of the Duveen wisdom on the part of the Duveen committee to concentrate their attention on exhibiting widely inexpensive works by good but lesser known painters; but clearly quite a different policy must be followed if the foreign exhibitions are to be helpful also to British art generally. To be candid, the two held this year the parts and Brussels have not been canvases with their pale colors, misty at Paris and Brussels have not been so good as they ought to have been. More care should have been exercised not only in the selection of the artists invited to exhibit but in the selection of the particular works exhibited. For an exhibition abroad something more than an average work by an averagely good painter is required. Only the best is good enough to stand the stress of severe foreign competition, and if the prestige of British painting is to be enhanced abroad this end can only be secured by limiting the exhibits to works of the very finest quality. For these what is really wanted is not at Paris and Brussels have not been canvases with their pale colors, misty The Chileans have always been known for their good seascapes, mostly in the manner made famous these what is really wanted is not so much the modest picture suitable for the modest home, but the picture bhowing such capacity in conception and execution that, whether sold or not, it cannot fail to command the respect of connoisseurs and the people who know. The first step is to be a proper of the long Pacific rollers are all of them capable. "Encuentro Palismere" in which sell and stamp spect of connoisseurs and the peole who know. The first step is to
nvince the world of the high merit
contemporary British art, and
nee this merit is recognized sales

tures of the long Pacine relievance all of them capable. "Encuentro
Peligroso," in which sail and steam
barely miss each other in the white
walls of fog, is a fine piece of work.
Good, too, is "Velero en la Niebla"

once this merit is recognized sales will follow automatically.

Good, too, is "Velero en la Niebla" with the gleaming height of canvas rising tall and ghostlike above the day many painters and sculptors of the highest talent, many of whom are very little known at present on the Continent or in America. It is the best work of these men and women that ought to be presented to the foreign public, and a new policy with this aim in view will have to be adopted if future exhibitions horoad are to have the success which the Duvean scheme deserves.

For 1928 it has been planned to hold exhibitions of contemporary instead a quiet serenity, the blue of the sale will be plainly noticeable.

Good, too, is "Velero en la Niebla" with the gleaming height of canvas rising tall and ghostlike above the severing mists sweeping up from the silvery gray sea. The heavy, oily seas of the Atlantic rising and falling in a treacherous swell are the teature of the picture entitled "Naves de Colôn"; the sunlight glints on white lines of foam and the gay banners all red and gold flap laily in the breeze.

In the Chilean exhibit there is nothing defiantly iconoclastic, taxing both eyes and imagination, but instead a quiet serenity, the blue of the foreign public and a new policy with this aim in view will have to be adopted if future exhibitions horoad are to have the success which lines of foam and the gay banners all red and gold flap laily in the breeze.

A Hermit Speaks

By ROBERT WADE EN who live and work alone M become silent, and a painter, in the solitude either thrust upon him or granted to him by his work may, in a crowded city, become as solitary as an ancient anchorite— and as inarticulate. Little by little he loses sight of what goes on ab him. His habits of silence and meditation grow. He becomes introspetive—concerned with those thin which take place within the fast-nesses of his own thought. He sees visions and he dreams dreams. Let such a one try to write or talk with real seriousness and in all prob-

ability he will encounter no end of difficulties. With arresting sudden-ness he finds that where he supposed ness is must that where he supposed himself to be quite like his fellows, in reality he is very different from them—that he lives in a different world, is conscious of different things, thinks in different terms and

things, thinks in different terms and even speaks a different tongue.

Yet with a moderate degree of regularity that same painter sets his work before his neighbors and solicits not only their attention but their patronage. Therefore his neighbors have something of a right—at least something of a privilege—to ask what is going on inside his thought, what sort of world is really his, to demand that he step forth and—if he has understanding—to declare himhas understanding-to declare him-

I once demanded that very thing of I once demanded that very thing of a painter friend. After a long pause in which he seemed like one who wished to run away, he said: "Do you know what it is to live so far within yourself that it is a long, long journey for you to reach the door of your own nature? Do you often make that journey? Do you cross the river, pass through the groves and meadows. pass through the groves and meadow of things to which you can put no name-with light sweeter and more golden than any light earth ever knew, with shadows blacker than the pits of Dante? Do you meet beings there beautiful and radiant beings there beautiful and radiant beyond all words, and poor, groping to black things that are men's strivings It is those visions that he tries to for light? Do you know the loneliness that lies at the heart of the wind? Do you hear within you the voices of stars and feel within you the icy creep of the tides? If you do, then you know something of the things I know, something of the things I see and paint."

Let's it and sings, and at the singing the strike man dreams—and sees visions. It is those visions that he tries to paint. They are the measure of his very "being."

If that last is true, and I think it is, then I for one, would measure all "works of art" from the noblest down, by that one supreme element—spiritual vision. Beside it artistry, things I see and paint."

him. From that moment forth such a one would see through eyes to which all things were beautiful, and hear with ears to which all sounds were sweet. There are times when

were sweet. There are times when that old tale seems true.

Inquire of a painter who, in a way of speaking, has encountered the fairies and ask him what he considers the most important element that enters into picture-making and I think he will say without hesitation,
"The most important thing is the
painter's inner vision." It is that
inner vision with which he forever
concerns himself. It is the image of it that he paints.

Such a vision may be brought into Such a vision may be brought into being and for a long time exist, an "inner thing," apparently uninfluenced by the exterior, material world. Too, it may be directly inspired by a landscape, the ocean, anything. But, however much that man may love the hills or the sea, regardless of how much they may inspire him, he will never paint them, first hand, according to the testimony of his physical eyes. Rather it is as if while before them, he stands and opens the doors of his heart and the feeling of the hills enters it and sings, and at the singing ters it and sings, and at the singing the man dreams—and sees visions. It is those visions that he tries to

things I see and paint."

There used to be—and no doubt still is—a tale told among some parts of the Scottish Highlands of how now and then the fairies would kidnap a man and set their mark upon

Spiritual vision. Deside it artistry, is of relatively small importance. Artistry can never make a trivial conception anything but trivial, and even though its artistry, stumbles, a great conception is always great.

assurance of youth. That he result is sometimes failure is almost unavoidable, but the general impression on glancing round the walls of the gallery where the canvases are hung is one of intense vigor, strong personalities at work in the world of

art, and a sense of beauty, fantastic and distorted according to the old conceptions of loveliness. "Maldonado," by Cuneo, is filled with such beauty. The strange dark tree lifting its branches against a

clear sky is a compelling piece of work. "El Ceibo," by Causa, shows a native tree, which in summer bears bright scarlet blossoms, in full

bright scarlet blossoms, in full flower, but they are drab and shape-

Paris and Montevidee, which are full of the swift and happy inspiration of the moment. "Pastoral de los niños" is a canvas remarkable for clear coloring and the simplicity of some of the Italian primitives. Milo

Beretta's landscapes are all capable, characterized by forceful drawing and vivid colors, his finest works being perhaps the two canvasses entitled "La Sirena de Punta Ballena" and "Pescadores."

and "Pescadores."

Among the portraits, most of which are striking if a little crude, Jose Cuneo's work stands out by reason of its vigor. Interesting but far from appealing is the same artist's study of Telémaco Morales, well-known culturists.

artist's study of Telemaco Morales, a well-known guitarist.

This collection of pictures has attracted great notice in Buenos Afres, being in the main very favorably reviewed by the press, and it is probable that at the annual salon held in Buenos Afres in September the influence of the Uruguayan artists will be plainly noticeable.

Liebermann Exhibition, Berlin

Among these are the celebrated "Net Menders," painted in 1889, and 'Jesus in the Temple," both the property of the Hamburg Hall of Art; "Old Woman With Goats," from the Munich State Gallery; "Biergarten in Brannenburg," owned by the Musée du Luxemburg, Paris; "Market-Garden in Delt" from a private let Garden in Delt" from a private Musee ou Luxemburg, Paris, Mar-ket-Garden in Delft," from a private collection at St. Gallen; "Oude Vink," the property of the Zurich Art So-ciety; "Children at Play" and "The Cabbage Patch," from the Dresden State Gallery, and many more. The Berlin National Gallery has lent a number of the artist's masterpieces, among them the famous "Flax-Draw-ers in Laren" (painted 1887); a por-trait of Richard Strauss (1918); "Grandchild of the Artist, with Nurse"; "Wannsee Garden" and a self-nortrait

self-portrait. Many paintings from the period of his frequent visits to Holland are shown, of which "Linen-Room of the Jewish Hospital in Amsterdam, "Sewing-School of the Amsterdam Orphanage" and "Dutch Farmhouse" are particularly fine examples. Professor Liebermann's affection for his beautiful home on the Wannhis beautiful home on the wann-see Lake, just outside Berlin, is well known. It is in paintings of the va-rious aspects of this garden that his love of flowers and trees, green lawns and shady paths is best ex-pressed. There are six different pic-tures of the "Wannsee Garden" in Chilean and Uruguayan Artists

One of the best known of the artist's larger paintings is "Alte Frau mit Ziegen," dated 1890. The One of the best known of the artist's larger paintings is "Alte Frau mit Ziegen," dated 1890. The three figures, the woman and her two goats, stand out against the wideness of the green-gray dunes with their narrow path through the loneliness. There is grandeur in the simplicity of this masterly treated subject.

The modestly are modestly and artists are two paintings of the artists and admiration. Many public and private galleries in Germany and a number from abroad have willingly lent their treasures for the occasion. where there was great physical freedom, as in the everyday life in ancient Greece, or in the artificial life in the studios of France. If there is ever to be a real American school of sculpture. I believe it will arise something "new" is the artist's undoing. The something new is in himself and it is immaterial whether he journeys to the South Sea Islands or elsewhere, for in the expression of the most ancient bit of nature that has been painted thousands of times he can reveal something new—if he lesswhere. Art requires is an artist.

mann's work are proceeding simultaneously in Berlin with that of the Prussian Academy—at Paul Cassirer's gallery a collection of 275 pencil drawings—finished pictures and sketches—and at Bruno Cassirer's gallery 80 pastel drawings. "In the public schools, however,

very young for such association. Here she studied for three years, principally with John H. Twachtman and with Augustus St. Gaudens.
One day a letter came to Miss
Annetta Johnson from Augustus St.
Gaudens. He wanted her to be one

ceptance must be written. Not till the letter had been posted did calmness return—a calmness that settled into a dull misgiving and gloom as depressing as joy had been exaiting. The note had gone bearing the name Augustus misspelled. How stupid the

method. The student should help the teacher to evoke art, not the teacher assist the student.

"I am teaching because of the years of study and training that I have had ought to be given toward the upbuilding of the real American art, which may come with a younger generation. I have given them all they could take. They are not ready for very much. But then, nothing of value comes quickly nor easily."

Augustus St. Gaudens was at that time working on the statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson Was assigned the portraiture work on it. She felt that she must help justify the existence of all Lyric Theater, New York, on Sept. 19. Under the sponsorship of Amard Which will meet in Pittsburgh on Sept. 20 to select the prize-winning seintings.

"Enchanted Isle," described as a "musical romance," will open at the Lyric Theater, New York, on Sept. 19. Under the sponsorship of American art, which may come with a younger generation. I have given them all they could take. They are not ready for very much. But then, nothing of value comes quickly nor easily."

Indeed, Mrs. St. Gaudens own life working on the statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson allowed work as at that time working on the statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson allowed work as at that time working on the statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson allowed work as at that time working on the statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson allowed with will meet in Pittsburgh on Sept. 20 to select the prize-winning sent the Logan which now stands in Jackson Park, Chicago, Miss Johnson allowed work as a that time working on the statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson the Statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson the Statue of General Logan which now stands in Jackson Park, Chicago, Miss Johnson the Augustus St. Gaudens was at that

Because of her apparent ability,
George Critchfield advised that she
become a student in the Arts Students League of New York, although
the talent of her yupin.

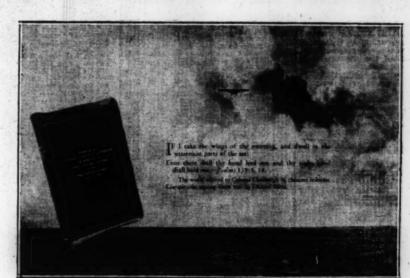

For 30 years Mrs. St. Gaudens tried
to rescue George Critchfield's unfinished works and preserve them. She
succeeded in part.

At present Mrs. St. Gaudens is completing the unfinished work of her brother, Burt W. Johnson. One of these commissions was a memo-rial fountain to Theodore Norton for Pomona College, California. Another is the herme statues to stand in of his assistants. Her excitement and joy knew no bounds. She flew about the house. She must pack her bas. No, she must finish the dishes. Oh, City. City.

The four European members of the Carnegie Institute International at Pittsburgh are Felice Casorati of Italy, Maurice Denis of France, Maurice Greiffenhagen of England. The note had gone bearing the name Augustus misspelled. How stupid the great man would think her! He would tell her not to come! But he didn't. She went.

Augustus St. Gaudens was at that which will meet in Pittsburgh on

OXFORD BIBLES

The Wings of the Morning

A MONG the many tributes offered to Colonel Lindbergh, none was more truly symbolic of his fearless spirit than the Oxford Bible presented to him,-the Book of courage, for the man who dared launch over the deep, piercing the skies, in confident trust.

Events moved too fast to permit the special binding of a Bible for presentation to him. Fortunately the Oxford Bible stock included a volume that proved adequate when only the best would suffice. The selection was an Oxford Teacher's

Bible, beautifully bound in the highest grade sealskin and printed on the famous Oxford India paper, with solid gold edges. It was good to be of service on so rare an occasion. It was equally gratifying to

sense what was implied when the Oxford Bible was chosen.

Inquiries have been received from people desiring to obtain a volume like the Colonel Lindbergh Bible for a keepsake. A similar one may be had by asking for Oxford Teacher's Bible No. 0942x, catalogued at \$26.00.

A card measuring 10% inches wide and 7 inches long, suitable for framing, with the illustration above, postpaid 10c.

Three New Oxford Self-Pronouncing Bibles

No. 01493x. Oxford self-pronouncing text Bible, size 61/4x41/x1 inches, brevier blackfaced type; Persian morocco, limp, leather lined, silk sewed, round corners, gold edges. Oxford India paper edition. \$7.50.

No. 02493x. As No. 01493x, but printed on a lighter grade Oxford India paper. \$3.00. No. 02400. As No. 01493x, but printed on fine white paper; 11/4 inches thick, cloth, round corners, red edges, \$2.50.

Price Trend Is Decidedly Irregular-Motors Are Conspicuous

NEW YORK, Aug. 29 (P)-Prices worked irregularly higher at the opening of the stock market today. U. S. Steel advanced 1½ in the first few minutes to a new top of 143½. A. M. Byers opened a point higher, but New York Central fell off a point at

the start.

The early upward movement was arrested by heavy profit taking liquidation in General Motors, U. S. Cast Iron Pipe and Pan-American B. General Motors old stock, which opened at 249½, quickly went down to 244½, while the new stock dropped 2½ in the first half-hour. U. S. Cast Iron Pipe broke below the 200 level, getting down to 198, a loss of 8 points, and Pan-American B fell 2 to a new low of 46. DuPont lost 3¾, and Pierce Arrow preferred sank to a new minimum.

mum.

Delaware & Hudson, which had a decline of 7 points on Saturday, recovered 3 points. Shubert Theaters quickly advanced 2% on a good earnings report, and American Woolen common and preferred made substantial gains. General Railway Signal went up about 2 points in the first half hour.

Stocks Irregular

Other issues which showed early buoyancy included Colorado Fuel, American Can, Woolworth and Radio

Foreign exchanges opened firm, demand sterling ruling close to \$4.85 13-16, and French francs around

3.91%c.

The rapidity of the fluctuations during the forenoon bewildered the trading element, who were puzzled by the frequent shifts of tendency in the absence of any definite news bearing on values.

After being apparently headed toward lower levels, with many stocks falling 1 to 5 points, the list suddenly reversed its course under the impetus of a furious builish demonstration in several specialties.

General Railway Signal mounted 4½ to 150%, a record price, while Timken Roller Bearing climbed 6½ to 150.

The rate for standing call loans was unchanged at 3½ per cent. Bonds Are Quiet

Bond prices continued to rule at high evels in today's market, although the olume of trading was again de-

cidedly small.

Aside from easy money conditions, there was little in the financial situation to support quotations, and yet many issues were at, or just under their high figures for the year.

A few convertible issues were attractive to traders, but the movement of such liens was much less active than in several sessions. Southern Pacific 4s were in the van of this group, changing hands in rather small amounts around their 1927 high of 99%. Erie D 4s were fractionally higher.

higher.

General Motors Acceptance 6s changed hands in moderate amounts just under their best price, but transactions elsewhere were rather widely scattered. High grade railway mortgages appeared to be at a practical standstill.

standstill.

The foreign group had for its feature a point jump in Berlin Elevated 6½s, which sold as high as 97%, a new peak price. Italian 7s were also bought in moderate demand around 95%, about midway between the high and low levels of the year.

United States Government securities were duit.

LONDON STOCKS RESUME ACTIVITY

LONDON, Aug. 29—The stock mar-ket generally had a cheerful tone to-day, with the exception of the oil group, which was again under pressure on reports of further cuts in petuoleum quotations. Many important oil men were of the opinion, however, that the worst of the depression in the industry was post

the industry was past.

Home rails were irregular. All of the rails in demand on reports of excoal and steel shares were also in

demand.
Rubber shares were quiet. Royal
Dutch was quoted at £28%, Rio Tinto
£39% and Courtaulds £6 25-32.
The glit-edge division was better

BOSTON & MAINE BOND OFFERING

This new 5 per cent issue will accomplish the retirement of \$29,298,000 of 6 per cent Boston & Maine bonds now owned or formerly owned by the

of 6 per cent Boston & Maine by the 8 now owned or formerly owned by the 8 United States Government, and \$1,-644,000 5 per cent bonds formerly held by the public.

The bonds are subject to approval of the Interstate Commerce Commission and of the stockholders. The new issue will be dated Sept. 1, 1927, will be due Sept. 1, 1967, and may be called at 107½ at the railroad's option on 60 days' notice up to Sept. 1, 1947, and thereafter at 105.

The bonds were oversubscribed.

CHICAGO WHEAT PRICES DECLINE

CHICAGO, Aug. 29 (A)—Sharp downturns in wheat values took place early today owing for the most part to big estimates of the yield in Can-

ada. Favorable narvest weather there was reported.

Opening %c to 1%c off, wheat prices later underwent a material further setback. Corn and oats were also weak, corn starting at %c to 1%c down, and subsequently continuing to decline. Provisions were firm.

The Shubert Theater Corporation and subsidiaries report for the year ended June 30, 1927, net income of \$1,62_577 after depreciation, interest and feueral taxes, equivalent to \$10.16 a share earned on the 160,670 shares of no par stock. This compares with \$2,320,867, or \$15,66 a share, on the 154,040 shares in the previous year.

OKLAHOMA COTTON POOL SUCCESSFUL

Participants Receive Good Profit From Venture

OKLAHOMA CITY, Aug. 29-Final sayments have been made to those OKLAHOMA CITY, Aug. 29—Final payments have been made to those who placed cotton in the Oklahoma "holding pool" last fall. A total of 112,635 bales was consigned; owners received a net average of \$55.45 a bale. The average local value of cotton placed in the pool was not over 7½ cents a pound, or \$37.50 a bale at the time the cotton was ginned.

Most cotton in the pool was of low grade, picked late in the season. Probably 90 per cent was snapped and

TIRE PLANTS AT CAPACITY

NEW YORK, Aug. 29 (AP)—Akron dispatches to Wall Street say preliminary estimates show that sales and production of the leading rubber manufacturers there in August have been close to the record-breaking figures of July. Current output of automobile tires in that district exceeds 140,000 units dairy, with most factories operating on a three-shift basis. There are indications of a slight slackening in demand from the retail tire trade, however, which probably will result in reduced operating schedules by some plant next month.

CAST IRON PIPE EARNINGS

The United States Cast Iron Pipe & South America
Foundry Company in the first six months of 1927 earned approximately \$15 a share on the 120,000 common shares or 1½ times the \$10 dividend for the full year. This is after all charges and preferred dividends. The earnings since the close of the first half-year have been about the same ag a year ago for the corresponding period. In the 1928 calendar year net for the common was equal to about \$35 a share.

Also by Local Adventising Representatives in many cities throughout the United
States and other countries. TRADE ON UPGRADE, ness on the upgrade, according to the First National Bank of Boston. As is usual for this time of the year, the increase in activity has been more pronounced in trade than in industry. pronounced in trade than in industry. With stocks apparently low, an increase in orders and sales must soon be reflected in industrial operations. Production in basic industries in July was well below the spring peak, and the decline was more pronounced than for the corresponding period in 1926. 1926.
This is largely accounted for by the sharp decrease in motor vehicle production, and by greatly reduced operations in the iron and steel indus-

20 12

MONTREAL Aug. 29—A special meeting of shareholders of the Shawhingan Water & Power Company has been called for Sept. 28 to authorize the creation and issue from time to time of \$200,000,000 of the first mortgage sinking fund gold bonds and debenture stock. In October, 1919, authority was given for creation and issue of \$50,000,000 in bonds, and at present there is outstanding \$26.129,500. Rapid progress has been made in the last few years and balance of \$50,000,000 available is not considered sufficient to take care of requirements in the next few years.

BY VIRTUE and in execution of the Power of Sale contained in a certain mortgage given by Beasie Levenson to Morris Roltman and Leo Hirshon, dated Aug. 7, 1924, and recorded with Suffolk Registry of Deeds, book 4601, page 58, of which mortgage the undersigned is the present owner by virtue of an assignment recorded with Suffolk Registry of Deeds for breach of conditions of said mortgage, and for the purpose of foreclosing the same will be sold at Public Auction at 10 o'clock a. m., on the 20th day of September, 1927, on the premises, all and singular the premises described in said mortgage. To wit:

A certain parcel of land with the buildings thereon, now known as and numbered 14 Woolson Street, situated in that part of the said Bootton, formerly Dorchester, and being shown as Lot. To on plan ms. 1007. J. Donovan with Suffolk Deeds, book 3187, page 250, bounded and described as follows:
SOUTHWEATERLY to M Voolson Street, thirty-four (34) feet.

NORTHWEATERLY by Lot "E" on said plan. SAYS BANK REPORT SOUTHWESTERLY on wousen sets of four (34) feet.
NORTHWESTERLY by Lot "E" on said plan, seventy-one and four-tenths, (71.4) feet.
NORTHEASTERLY by land of owners unknown, forty (40) feet.
SOUTHEASTERLY on Leslie Street, seventy-one (71) feet.
Containing two thousand six hundred and thirty (2630) square feet of land.
Balar the same premises conveyed me by deed erations in the iron and steel industries.

The average daily steel output for the last month was the lowest since July, 1925. Subnormal demand for steel products by the automobile industry and by the railroads was chiefly responsible for the reduced operations. a prior mortgage to the hundred (\$5500) dollars.

Also the land in Dorchester District of Boston. Suffolk County, Massachusetts, bounded and described as follows:

Starting at a point in the Westerly line of Leale. Street, seventy-one (71) feet from Woolson Street and running in WESTERLY direction by land of owners under the country free (85) feet, thence in an ARTHEL LAY (1998) and the country free (85) feet, thence in an ARTHEL direction by lot "by one plan hereinafter described one bundred five and fifty bundredths (105.50) feet, to said. Westerly line of Leale Street, thence SOUTHERLY by said Westerly line of Leale Street, thence forty-five (45) feet to the place of beginning. EUROPEAN BUSINESS BETTEE
WASHINGTON, Aug. 27 — Continued
business recovery and further improvement in buying power in northern and
central Europe is indicated in reports
received by the Department of Agriculture. There are signs, however, of a limit
to further expangion of both domestic
and foreign trade in Germany. Although
that country remains in the lead of industrial progress, a rising tendency in
industrial commodity prices is checking
the forward movement. Fairly favorable
conditions are reported in Belgium, Poland, Sweden, and Switzerland, and Ausria and Czechoslovakia are maintain
ing the relatively satisfactory levels
reached in June. EUROPEAN BUSINESS BETTER beginning.

Jontaining four thousand six hundred and three (4608) square feet, and being lot "E" on a plan entitled "Ebudivision of Lots in Mattapan," belonging to Annie Novick, dated November, 1918, M. L. Goldbistt, surveyor, recorded with said Deeds, book 3900, page 408. Being the same premises conveyed me by deed of William R. Landers, dated Oct. 5, 1923, duly recorded with said Deeds, book 4512, page 67. LARGER IDAHO WHEAT CROP SALT LAKE CITY, Utah., Aug. 29— The Idaho wheat crop this year is ex-pected to total 31,000,000 bushels, as compared with 24,000,000 bushels in 1926.

THE UNCONVENTIONAL

Baltimore Sun: Like the modern flapper, the Indian is under a certain social pressure to be what he is popularly supposed to be. As the superintendent of their reservation hints, few of the Sloux tribe who are to parade before Mr. Coolidge this week feel really at home with the war paint, regalia and primitive dances which they are going to exhibit. But in between discussions of crop prospects and study of farm implement catalogues they will try to exhibit the wildness which is expected of them. The unconventional may be be the most insistent of all conventions. THE UNCONVENTIONAL

Dallas News: The only perfect city plan is the one you hear about in candidates' speeches.

THE NIGHT SCHOOLS Los Angeles Times: Night schools for adults—the schools being located in the heart of the comcated in the heart of the com-munity, are now a part of the ac-cepted educational program in any progressive city. It is becoming an obligation of the state to meet the demand for knowledge, no matter at what age it may be manifested. If the worker would supplement his schooling or specialize in any field of information, it is well that the opportunity and the educational ma-chinery should be at hand. It must make for better citizenship. Aisless of learning should be open to all.

Louisville Times: The only thing that doesn't become amailer when it is contracted is a debt.

RHODES SCHOLARS Glasgow Herald: In the eyes of Americans who are anti-British, the returned Rhodes scholar will always be a stumblingblock and an offense, but the competition for the scholarships, and the personality of the men who come to Oxford from the United States, afford ample proof that sane American opinion recognizes the value of the opportunities thus afforded.

Ohio State Journal: When we're afraid of an issue we say it isn't one.

EDITORIALS

Williamstown and Other Institutes

Two facts relative to the annual Institute of Politics at Williamstown, which has just ended for this year, seem to indicate that it clearly is filling an educational need. It has now completed its seventh year. When it was first established there was doubt as to whether it would be a continuing event, and the gentleman who provided for its financial needs, Mr. Bernard M. Baruch, contemplated in his first benefaction only three years of continuance. The institute emphatically has made good, and is fairly to be reckoned as one of the prominent educational establishments of the United States. Its quality is still further testified to by the fact that it is being widely imitated, although those that follow in its lead adopt somewhat different lines of policy. Today the Universities of Cali-fornia, Chicago, Georgia, New Hampshire, Virginia and Dartmouth College all have their annual institutes for free discussion of political topics. The Institute of Pacific Relations, meeting annually at Honolulu, has also many of the characteristics of the Williamstown event.

Readers of those daily papers which have given special attention to the institute may at times have felt that it was an open forum somewhat given to heated discussions, and not a little subject to the charge of presenting international propaganda. In a sense both charges are true, and neither in any degree militates against the usefulness of the institute as a factor in international education. The debates have been vigorous, and it is no small tribute to the spirit in which the sessions have been organized that both sides of every question have been adequately represented by capable interpreters, and that no limitation has been placed upon the freedom of speech. And as for international propaganda, it is likewise true that representatives of ideas, possibly foreign to those of the United States Government, have been permitted to present them in the most convincing form of which they are capable, but there has always been an American spokesman to present the nationalistic point of view. This has been particularly true on questions affecting international debts, the navies of the world and the administration of the Philippine Islands.

Out of these sharp clashes of opinion, eagerly listened to by a selected body of intelligent observers of international currents, there has undoubtedly proceeded a wider knowledge and a more tolerant understanding of the problems which today affect the world. No one could attend regularly the lectures and round tables at Williamstown without becoming a better informed, and therefore more useful, citizen; and this result undoubtedly attaches to the deliberations of the similar institutes which have sprung up in other parts of the country. Some deal with national affairs only, others give over their whole time to one limited question of foreign policy. But all contribute notably to the evident widening of the American viewpoint on public

Until the Farmer Is Heard From

NEN those speakers at the Williamstown Institute of Politics who have so eloquently presented the case of the farmers of the United States in the desire to arouse public sentiment in support of proposed legislation in their behalf probably will admit that there is lacking, except in a few of the states, any political tendency upon which there might reasonably be based the claim that there is a strong trend in the direction of independent or third party action on the part of those who insist that they have failed to receive at the hands of Congress that consideration to which they are entitled. One who recalls previous efforts to align those organized political parties is reminded of the launching of the Farmers' Alliance, the Populist Party, and even the Free Silver Party of a generation ago. Historians, not without reason, have recorded their conclusions that progressive and sound legislation has resulted, more or less, directly from such efforts. But the same historians have recorded the rise and fall of such movements, usually with the observation that they accomplished a little only because they asked and attempted much.

But those who seem somewhat extravagant in their forecasts should not fail to take into account the fact that not even the nucleus of a third-party movement can be formed when there is lacking a pronounced division of the voting strength of a state or section regarding some fundamental, or allegedly paramount issue. There is no such division, sectional or otherwise, regarding the desirability, if not the actual necessity, of enacting some form of farm relief legislation. The gentlemen who have come out of the West and South to proclaim the doctrine which they have espoused evidently have done so because they believed the so-called industrial East was not aware of the true conditions in their sections. They make no mention of the fact that the national Administration which they so freely criticize has for some years been in sympathy with just the thing they de-

mand shall be accomplished. But there does exist, quite naturally, a difference of opinion as to the ways and means which should be adopted. And an important feature of this difference is that it is as frequently emphasized in Iowa as in Massachusetts, and as eloquently expressed in Kansas as in any of the manufacturing states of the East. The disciples of McNary-Haugenism cannot reasonably claim to speak as the representatives of even a majority of the farmers of the middle West and South, and probably not for one-fourth of the business men and manufacturers of those

These persuasive and sometimes eloquent advocates have enjoyed at Williamstown an opportunity which they have by no means overlooked. It may be that they have, because of the apparent lack of restraint, placed themselves in a position which they will be asked to explain or defend when they return to their homes. The people of the West are not impoverished. They are not in a desperate condition. Their credit has not been destroyed. It is true that they

have been obliged, in the last six years, to write off many millions of dollars of paper assets, but most of the farmers realize that their lands are now worth more than they were before the period of inflation brought on by the war emergency, and many times more than they were when originally acquired. The interested investigator will fail to find, except in a few sections of the agricultural areas of the middle West, evidences of the existence of that eco-nomic discontent which is the inspiration of third-party movements.

Arbitration and the Senate

THERE seems reason to believe that the treaty for the "Outlawry of War" proposed by the French Foreign Minister, M. Brland, will receive some attention in the United States Senate this winter. Reports have it that the unsettled state of the negotiations for the funding of the French debt may interfere with its completion. That is not improbable. Indeed, nothing is improbable which would indicate the frequent opposition of the United States Senate to any specific action for the substitution of arbitration for war.

Historians point out, not cynically, but regretfully, that the United States has manifested more generous approval of the theory of in-ternational arbitration, and the United States Senate more persistent opposition to transmuting this devotion to theory into actual legislative accomplishment than is to be found in the history of any other nation. Certainly the legislative history of efforts at arbitration

in the United States is not encouraging. The peace movement in this country began with the organization of peace societies in New York and in Massachusetts in 1815. From that time until 1856 these societies and their later affiliated bodies were persistent in urging arbitration upon Congress. The only result was a paragraph in the Treaty of Guadalupe Hidalgo, between the United States and Mexico, providing for arbitration of disagreements. History shows that not one single arbitration with Mexico has ever been based upon this paragraph, although special legislation has provided for arbitration conferences with that country. Be-tween 1838 and 1853 the House three times, and the Senate twice, refused to act on resolutions favoring arbitration.

Perhaps, however, the incident which most encouraged the friends of arbitration in the United States was the submission of the Alabama claims to the Geneva Tribunal of Arbitration. Immediately after the outcome of that episode, both the House and the Senate passed resolutions favoring arbitration which were, of course, mere expressions of opinion, and had no legal power. Despite the fact that these resolutions were on the record, in 1883 a Swiss arbitration treaty was turned down, and in 1897 a similar treaty with Great Britain was rejected by the Senate.

Notwithstanding various discouraging events of this character, President Roosevelt in 1905 said, in his message to Congress

There seems good ground for the beflef that there has been a real growth among the civilized nations of a sentiment which will permit a gradual substitution of other methods than the method of war in the settlement

The President was a little too sanguine. The Executive, in pursuance of his theory, negotiated no less than eleven treaties with the foremost powers of Europe, and with Japan, all of which had to be abandoned after the Senate had so amended a treaty with France as to destroy its value according to the President's opinion. But later, in 1908, under the secretaryship of Elihu Root, the Hay treaties were revived. Twenty-five were negotiated; twenty-two were finally ratified, and of these, eleven have been allowed to lapse. Of those still in force, some will lapse in 1928, and others are ineffective because the State Department has never appointed the commissioner provided for by them. The many treaties negotiated under the secretaryship of Mr. Bryan were not technically arbitration treaties, but treaties for conciliation. Twenty-one are still in force, but only three - those with Denmark, Portugal and Sweden-can be regarded as operative, because of the failure in other cases to maintain commissioners

It would seem that a searching inquiry into the present status of the treaty relations of the United States, particularly with the more powerful nations of Europe, and having reference primarily to the recognition of the principal of arbitration by this government, might well be undertaken by a Senate committee during the coming winter.

Forest Wisdom in Idaho

THE American state of Idaho is generally pictured as a mountainous region dotted with mines and ranches and producing chiefly metals, cattle, sheep, wool and a famous senatorial orator. But it has another source of vast present and future wealth by which it will be known-lumber. Its forests are of great extent and contain huge quantities of white pine and other valuable timber trees. The State has enacted wise forestry laws for the preservation of this wealth. It has an active and efficient school of forestry. Big companies have begun to develop its lumber resources. One of the largest is pursuing a policy that is worth watching by other lumber corporations and the people of other states, for it is conducting its operations with an eye to the long future and planning so that it will draw profits from the forests continuously during an indefinite period of years.

This corporation is the Clearwater Timber Company of Lewiston, Idaho. It is opening up the largest continuous stretch of white pine in the State in association with the Pacific Power and Light Company and the Northern and Union Pacific railroad companies. Its program includes the construction at Lewiston of a modern lumber mill with an annual capacity of 200,000,000 board feet, the building of a dam across the Clearwater River to produce electric power for the mill and form a log storage pond and the construction of forty-one miles of standard railroad. The cost of the mill, the dam and the railroad will be about \$11,000,000.

The timber area thus to be opened contains the Clearwater Company's present holdings,

about 200,000 acres, 125,000 acres owned by other companies and individuals, 125,000 acres belonging to the State of Idaho and a vast area

of National Forest timber that eventually will come through the Lewiston gateway.

The area in question is not suitable for agri-culture. Owing to the nature of the soil, the mildness of the temperature and the abundance of rainfall, it is particularly well adapted to the rapid growth of valuable timber. The forwardlooking wisdom of the Clearwater Company's plans that make them worth study by other corporations and other states lies in the manner in which it cuts its trees and the condition in which it leaves the ground that is cut over. It began operations in 1926. It felled white pine trees that were eighty to one hundred years old, obtaining 40,000 feet of lumber to the acre. Trees eleven inches in diameter and under were left standing for future growth and production of seed. The slash was gathered and burned. A survey by the Idaho School of Forestry indicated that the trees left standing would furnish a profitable second cut in 1961, only thirty-five years after the first cutting."

The Aerial Welcome

WITH shrewd prevision, the United States
Department of Commerce has issued instructions whereby towns and cities may know the proper size of the letters, and how best to repose them on the landscape, in order to identify themselves for the guidance of aerial travelers. This should save a lot of trouble in the future when without such information the mayor and board of selectmen might have to go up and down several times in a balloon before deciding whether their local identification was visible at a reasonable altitude.

Uniformity is also desirable, and an even shrewder prevision might well determine in advance whether private enterprise shall be permitted to enter a new and tempting field of advertising. It has taken time and effort to curb, even partially, the zealous tendency of private enterprise to supplant landscape with advertising. To be sure, it will be quite a while, at the nearest, before the volume of daily air travel warrants the expense of using the planet for a billboard; and many experiments will be necessary before the outdoor picture gallery can be painted and exhibited horizontally.

be painted and exhibited horizontally.

That many towns and cities will sooner or later be thus labeled goes without saying. Meantime towns and cities are here and there labeling themselves for the benefit of motorists, so that the traveler may know that Timbuktu heartily welcomes him as he enters and as cordially invites him to come back when he departs. This is a help to the motorist, wondering where he is, and to the citizen, whom he otherwise would interrogate and who would probably forwar the interrogate, and who would probably forget the amenities of hearty welcome and cordial invita-tion to return. And even if the motorist has no time to stop and never comes back, these amenities warm the heart.

Commemorated in Peace.

THE esteemed Boston Herald has made a motion which millions of people in the United States and throughout the world will heartily second. It is that the new bridge being built to connect the Lincoln Memorial, on the Washington side of the Potomac, with the tormer homestead of Robert E. Lee in Arington, be usued and dedicated as the Bridge of Lincoln and Lee. Present reference is made to the beautiful structure as the Memorial Bridge, of which there are countless numbers. Realizing this with its undeniable that the designation is somewhat meaningless because it fails to fix in somewhat meaningless because it fails to fix in thought immediately the specific locality or object which it pretends to identify or desig-

Then also the name which is proposed is especially appropriate because it would serve to emphasize the fact that the scant distance which divided these two great leaders, and which is now being bridged by a material structure, never more than temporarily separated the North from the South politically or sentimentally. In the city of Washington there is now idealized and outwardly personified that more complete union which has been realized, not because of internecine war, but in spite of it. There the people, first in thought and then in marble and bronze, have erected their enduring monuments in commemoration of a peace forever established and forever to be cherished. Upon those monuments the names of Lincoln and Lee are indelibly inscribed. The dividing imaginary line has long been bridged. Its last faint markings have long since been

To the generations which are taking their places on the stage of action today the tragedy of a preceding generation of Americans is hardly more than a tradition. But by them, as by their immediate predecessors and those who endured the hardships and the sorrows of those years of bitterness, there will be held in growing respect the names of two men who, had the decision been left to them, would have spared their common country the sacrifice which others regarded as unavoidable.

Editorial Notes

In declaring that the greatest prize in aviation today—greater than any competitive flight award—is the perfecting of a small, economical and entirely reliable airplane, to permit safe flying by the average person, Glenn L. Martin, well-known filer of an earlier day, expressed a thought which must have come to many observers of recent air events.

What a grand time one could have any rainy afternoon in the attic browsing among those 350 volumes representing more than 100 schemes for a perfect social state, a Utopia, just presented to Harvard University. This collection is said to be the only considerable one with the exception of the unparalleled library of John Burns in London.

Results of Chicago's experiment in using radio in the classroom indicate that even the best loudspeaker cannot successfully substitute for the teacher's smile.

Jiddah in Pilgrimage Time

VISITING Jiddah in Arabis, at the period of the Great Pilgrimage is a very different affair from visiting the place any time during the remaining ten months of the year. On approaching the port one sees a regular fleet of ships of many nations moored with almost naval precision, and an activity reminiscent of the actual visit of a large fleet to a foreign port.

This year the time of the pilgrimage happened to be during the hot season—the second week in June to be precise—and the journey to Jiddah in a pilgrim boat was not an altogether unmixed blessing.

Certainly the pilgrims were well-behaved, quiet and polite, but they were simply everywhere on the vessel, in any and all classes of accommodation, up and down ceaselessly, in and out and as often as not, praying in the most awkward and unlikely spots. And then when we arrived level with the appointed locality on the shore, where the holy region is taken to commence, prayer and chant were set up with special energy and the appropriate glothes donned for the great occasion.

It can be imagined how the whole position must strike the pilgrim who has perhaps been waiting and saving for years for this journey, which is the outstanding event of his whole existence. To the non-Moslem, the great and implicit trust in God is indeed strikingly impressive.

The mass of pilgrims from India and the Dutch Indies arrived in vessels of their respective countries; others came in British, Greek and Italian vessels. The total number of persons, who made the pilgramage this year, was expected to reach nearly 150,000, notwithstanding two disputes which limited the numbers of Egyptians and Persians respectively.

The Egyptian dispute related to the non-dispatch of the "Mahmal," that is to say the customary caravan under armed escort, which takes a special "veil" from Egypt to place on the great black rock in the big mosque at Mecca. King Ibn Saud represented that under his control of the Hejaz, there was no necessity for armed escorts and that he was quite prepared to keep the peace on the line and elsewhere. The Egyptian Government refused to dispatch the "Mahmal" without escort, so it has accordingly not been dispatched.

The second dispute related to the razing of certain special praying mounds at particular localities in Mecca. In the matter of King Ibn Saud's contention as to security, and peaceful movement to and fro, there is no ques-tion that in the Hejaz as hitherto in Nejd, he is altogether capable of making his word good. Armed men are little in evidence, and it is a fact that in and around Jiddah, even in the most crowded days, persons can move in perfect safety any time of the day or night. The law and order is quite remarkable, as also farther up the line.

The King himself personally directs and manages all affairs connected with the pilgrimage and it cannot be gainsaid that his rule, succeeding that of the Hashimite dynasty and previous to that of the Turkish Government, makes for a united and strong direction of affairs from

makes for a united and strong direction of affairs from the Persian Gulf to the Red Sea.

Life in Jiddah must be hard for any westerners, the climatic conditions being at times almost intolerable and the amenities of existence scanty. While there is a good system of water supply by means of condensing applicatus (managed by an Englishman whose wife is the only Padish lady in Jiddish); it would seem to be a good opening for an enterprising person to install an ice plant. Some enterprises are progressing, notably the sale of motorcars, but as usual none of filese are of British make. The consular corps is fairly representative, mainly on account of the various nationalities of the pilgrams, but it appears likely that the time must arrive when Ibn Saud's status as a monarch reigning over vast dominions, will necessitate the appointment of duly accredited representatives to his court. tatives to his court.

As far as British interests are concerned, commercial matters are lagging somewhat, primarily, I suppose, owing to the high prices charged, but politically Great British seems to be well holding her own, and her relations with the King are of long and proved standing, loyally adhered to by His Majesty and not founded upon the handfuls of gold, which according to all accounts, were treaty bestowed upon his unfortunate anadecess.

freely bestowed upon his unfortunate pred Hedgar throne. It remains to be seen how far and if the Italian perle tration in the Yemen, and Italian relations with the Imam of that place, Ibn Saud's sole rival now in Arabia, will

eventually complicate matters. There are still naturally many points to which the present enlightened and powerful monarch will have to turn his attention, and it is to be hoped that one of these

will be the liquor question.

As a Wahabi, no one can be more strict than he is to keep Moslem tenets pure, and the lax views of the Turka, carried on by other well-to-do Moslems under the former régime, must from a religious aspect afford a theme for scandal among unbelievers.

dignity, lost a little of it in avoiding the headlong feet of a Central News messenger-boy, and retired to a more sectuded spot in the coat and parcel office, where his high thoughts would not be disturbed.

B. T.-J.

A Cat's-Eve View of the Law

THE Senior Cat of the Law Courts sat on the floor of the Great Hall near the notice-board and regarded with languid interest the feet of those passing by. To have looked up at the rest of them would have entailed more effort than they were worth. Besides, he knew from long experience all about their owners, legally, from this correspondence. from this somewhat restricted view of them.

Those large and stationary boots near by, for instance,

belonged to one of the older ushers. It was inconsiderate of him to stand so near because the kind of boot-polish he used was inferior and of an unpleasant smell. However, one got used to anything. Those two small feet that had just hurried up and halted in front of him, encased in suede shoes with high heels and diamond paste buckles, belonged probably to a lady juror who was now ten minutes late for the assembling of the Court. Yes, she was asking for Mr. Justice Mugg's Court. She was unfortunate, because old Mugg was unsympathetic toward cats and late jurors alike, and would take no excuses as to traffic hold-ups or tube breakdowns.

Those two patent leather shoes that hurried by next the cat knew very well; they belonged to Mr. Blowhard K. C.'s clerk. He was really Mr. Blowhard's managing partner if the truth were known: "We," the cat had heard him say to no less a personage than the Mr. Tape of Tape, Sons, Wuggle and Tape, Solicitors, "are in the House of Lords tomorrow, and in any case I could not dream of letting Mr. Blowhard go into court under 200 guineas." He was now on his way to arrange the business of the courts as far as Mr. Blowhard was concerned; that gentleman had five cases on in different courts today at 10:30 and it would need all the clerk's skill to avoid disaster—a postponement here, a settlement there, a meteoric appearance in the remaining cases. So the patent

The next two pairs of boots, marching slowly and irresistibly in step, undoubtedly belonged to two police witnesses. In his young days the cat had always found policemens' legs the most satisfactory thing to rub against, and on one epic occasion had even done so when the officer was tanding in the witness-box one drowsy summer day when the court usher's vigilance was relaxed, with the result that the policeman's usual recital from his notebook, beginning "At about 4 p. m. on the height I was standin houtside the Red Lion in the Lower Kennington Road . . ." was somewhat less steady than usual.

Two pairs of leisurely feet pacing up and down; two calm and collected voices. A remark floating down as they "My dear man, I couldn't persuade my man up another hundred even if I wanted to. And you'll have to amend your pleading before you can get anything at all, and that means costs"-reveals counsel's occupation of settling a case. Very shortly they will get up before the Judge and explain how the other side has withdrawn all their accusations, unfounded of course, and how happy they are to be able to tell his Lordship that he will not

now be troubled, etc., etc.; indorse their brief with a triumphant flourish; and so back to chambers with the consciousnes of a day's work well done.

A whir and flutter of silk gown and two-button glace boots striding earnestly forward, Mr. Blowhard himself passing by. The voice that has carried awe and persuasion to so many jurors and witnesses, so that the simple sentence "It was on a Thursday, members of the jury" carries such a wealth of meaning that all the jurors resolve never to do anything again on a Thursday, speaks now fevially to his legal client of the Perfect Golf-course, as though—as is indeed the fact—its owner were the mildest man in all the world. Like all busy men, he is a master of minutes! and the cat remembers an occasion when the great man stooped to stroke him.

A suitor's feet this time; the voice and they evidently come from Lancashire. "Ah tho't it were a question of t' cotton being up to standard or no; but now t' lawyers have got hold of it 'tis all mixed up with a thing called onus and the Statute of Frauds. However, if they brass

Sixteen feet of various sizes and shapes advancing; with four voices raised in various degrees and tones of protest. The latter, as is well known to the cat, belong to the unsuccessful party and his friends; the eight silent and satisfied feet belong to the successful party. It is all about a lorry-load of tomatoes that got scattered over the Strand somehow, and if the four voices are to be believed the amount of rapacity and perjury they have caused is colossal and the case is to be taken to the House of Lords

The cat, disliking noise, and having but faint enthusiasm for either tomatoes or the House of Lords, rose with dignity, lost a little of it in avoiding the headlong feet of a

From the World's Great Capitals-London

ISS RUTH DRAPER, the well-known American Address, whose extraordinary eleverness and talent have won for her such an unusual place, has been delighting London, and, as a number of newspapers have commented, is the only person who ever ran a season single-handed in a London theater, playing to capacity houses all the time. So successful has she been that accounts of her work and of the crowds that surround the theater at every performance have been transferred from the theatrical to the general news columns of the papers. It is said that no performances ever given in London have attracted such diverse audiences. Ladies in Victorian raiment who have not attended the theater for three decades have come to watch Miss Draper's work. As the Manchester Guardian says, "She is an extraordinarily clever mimic, but the people she mimics are not so much individuals as types. That is the charm of her work, and individuals as types.
that is why it cuts so deep."

The highly successful advertising convention just held in London brought out the inevitable crop of stories, of which the following amusing tale is one. A persistent advertising canvasser called upon a retail merchant, who declared that no one bothered to read advertisements. At last the canvasser offered him a free advertisement just as a test. "You can say what you like about me. Nobody will read it," said the obdurate man. The canvasser arranged a three-line notice in an obscure column to the effect that the merchant in question wanted to buy a cat. Four hours after publication an urgent message was received at the office of the paper, asking that the notice be withdrawn at once, as 117 cats had arrived in that time. After recovering from his natural annoyance, the merchant saw the moral and joined the select company who have learned what the printed word will do for their enterprises.

learned what the printed word will do for their enterprises.

"Lenine Estate" is a name decided upon after lively debate by the Bethnal Green Borough Council for a block of municipal dwellings just erected in this London suburb. Bethnal Green is a slum area that has been for some time past under the control of Socialists. The adoption of a name which associates the Borough with the Russian Soviets was strongly opposed by the Conservative minority upon the Council as calculated to "stigmatize and mark with an alien brand the part of the Borough to which it was applied": but this objection was overruled by fourteen votes to ten on the ground that Lenine is at least as suitable an individual to be honored as are Handel, Menable an individual to be honored as are Handel, Men-delseohn, Mozart and Pasteur. The incident has attracted

LONDON a good deal of attention as illustrating the contest of ideals still going on not only in municipal affairs but also in party politics in Parliament and in the entire British Labor movement.

A "movie" film that cost only £250 to produce is being tried out in London. It is the work of Oxford University students and teachers, the parts being taken by under graduates and undergraduettes, none of whom were paid any salaries. The title of the film is "Next Gentleman, Please." It was made in the quaint old village of Thame in Oxfordshire, some of the scenes being actual ones from a country fair there. The story was written by a Trinity

College "don."

To encourage cleanliness, clear-speaking, and general smartness, the Cecil Hotel has instituted a quarterly inspection and contest among its large platoon of page boys. The judges at the initial contest first made a close inspection of shining buttons, impeccably creased trousers, spotlessly white gloves, and shining faces. The boys then faced the elocution test, which was much more difficult. They had to march around the large hall in which the contest was held calling out the names and room numbers of imaginary guests. The names included such tongue-twisters as Dr. Gawronsky, Mr. Schierwater, and Mr. wisters as Dr. Gawronsky, Mr. Schierwater, and Mr. Monfarrige. James Chaney, the smallest boy, won the prize. Although he only reaches to the waist of the average hotel guest, his clear, stentorian voice more than made up for his size, or lack of size. He strode unblushingly around the hall calling out "Monsieur Contomichalos, two three four, please." The "please" was uttered softly, but persuasively, and James was awarded the first prize, a silver watch and a medal watch and a medal.

Sayings of the week:

Motorcars have been increasing by leaps and bounds, and pedestrians have been surviving by the same means.— Lord Dewar.

I am never pessimistic when I travel within our Empire and remember the difficulties faced by our old pioneers, and know that the same spirit is still there.—J. H. Thomas, M. P.

Forgiveness lies at the bottom of Christianity, and kindliness is still the great secret of life.—Mr. Justice McCardie.

Continuity is the secret of successful advertising.—Maj. Montague Gluckstein.

Keep always with you the company of great thoughts.

Keep always with you the company of great thoughts, the inspiration of great ideals, the example of great achievement.—Sir Maurice Croig.
